TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

1 The Company

Legal form:

The Company was incorporated as a private limited liability company in 1956 and was converted to a public company in 1978. The merger of the Company with Elf Oil Nigeria Limited which commenced globally in November 1999 was completed in Nigeria in 2002. With this development, the authorised, issued and fully paid share capital was ₦148,541,000 made up of 297,082,000 ordinary shares of 50k each. In 2003, to mark the completion of its corporate mergers, Total Group worldwide reverted to its former name Total and adopted a new logo with a unifying design to express its corporate ambition.

With the capitalisation of the bonus issue of 42,440,228 ordinary shares of 50k each in March 2004, the authorised share capital became ₦169,760,918 made up of 339,521,837 ordinary shares of 50k each. 61.72% of the Company's ordinary shares were held by Total Societe Anonyme up until 2013 when a restructuring was concluded and Total Raffinage Marketing became the shareholders of 61.72% of Total Nigeria Plc (now TotalEnergies Marketing Nigeria Plc) while the remaining 38.28% are held by some members of the general public. Total Raffinage Marketing is now called TotalEnergies Marketing Services.

In 2021, Total Group worldwide changed its name to TotalEnergies and adopted a new logo, thereby anchoring the transformation into a broad energy business within the Company's identity. Accordingly, the Company changed its name from Total Nigeria Plc to TotalEnergies Marketing Nigeria Plc in the same year.

	30 September 2023		31 December 2022	
	Number	Holdings	Number	Holdings
	'000	%	'000	%
TotalEnergies Marketing Service	209,560	61.72	209,560	61.72
Other shareholders	129,962	38.28	129,962	38.28
	339,522	100.00	339,522	100.00

No shareholder, except as disclosed above, held more than 5% of the issued share capital of the Company as at 30 September 2023 (2022: nil).

Principal activities

The principal activity of the Company is the blending of lubricants, sales and marketing of refined petroleum products and solar products .

Description of business

TotalEnergies Marketing Nigeria Plc. ("the Company") is a subsidiary of TotalEnergies Marketing Services ("the Parent Company") in France and operates in the petroleum marketing and distribution business in Nigeria. The Company's registered office is situated at:

No. 4, Churchgate Street
Victoria Island
Lagos State

2 Basis of preparation

2.1 Statement of compliance

These financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and in the manner required by the Financial Reporting Council (FRC) of Nigeria (Amendment) Act, 2023 and the Companies and Allied Matters Act (CAMA), 2020.

2.2 Basis of measurement

These financial statements have been prepared on the historical cost basis except otherwise indicated.

2.3 Functional and presentation currency

These financial statements are presented in Nigerian Naira (NGN), which is the Company's functional currency. All financial information presented in Nigerian Naira have been rounded to the nearest thousand except otherwise stated.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

2.4 Financial period

These financial statements cover the financial period from 01 January 2023 to 30 September 2023, with corresponding figures for the financial period from 01 January, 2022 to 30 September, 2022 and 01 January 2022 to 31 December, 2022 where applicable.

2.5 Going concern

The directors have undertaken a review of the Company's business activities and have concluded that the Company will still be able to realise its assets and settle its obligations as they fall due and as such these financial statements have been prepared on the basis applicable to a going concern.

2.6 Significant events and transactions

Other than events already disclosed in the various notes, there are no other significant events in the period that are required to be disclosed.

2.7 Use of estimates and judgments

In preparing these financial statements, the directors have made certain judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised prospectively.

(a) Judgement

Information about judgements made in applying accounting policies that have the most significant effects on amounts recognised in the financial statements are as follows;

(i) Cash held with Total Treasury - Note 27

Determining if balances held with Total Treasury meets the criteria for classification as cash and cash equivalents.

(ii) Lease term - Note 17 (iv)

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

(iii) Asset retirement obligation - Note 17 (iv)

Whether the Company will dismantle and remove its leasehold improvements on underlying asset or restore underlying asset.

(b) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties at 31 December 2022 that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities in the next financial year includes;

(i) Measurement of defined benefit obligation: Key actuarial assumptions

The amount recognised in note 12 of the financial statements as employee benefits - measurement of the Company's employee benefits. This estimate relates to the discount rate, withdrawal, mortality and inflation rate applied in the computation of the Company's liabilities.

(ii) Measurement of Expected Credit Loss (ECL) allowance - Note 30(iv)

Information about measurement of trade receivables and contract assets: Key assumptions in determining the weighted-average loss rate.

(iii) Measurement of contingencies - Note 28

Recognition of contingencies - key assumptions about likelihood and magnitude of an outflow of resources.

(iv) Incremental borrowing rate - Note 23

Estimation of the applicable borrowing rates.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

3 New standards and interpretations not yet adopted

Amendments to Standards and Interpretations are effective for annual periods beginning after 1 January 2023 and early application is permitted; however, the Company has not applied the amended standards in preparing these financial statements. Those Amendments to Standards and Interpretations which may be relevant to the Company are set out below.

The directors are of the opinion that the impact of the application of the relevant standards and interpretations will be as follows:

Standard/Interpretation effective as at 30 September 2023		Date issued by IASB	Effective date Periods beginning on or after	Summary of the requirements and assessment of impact
Amendments to IAS 1 and IFRS Practice Statement 2	<i>Disclosure of Accounting Policies</i>	January 2020	1 January 2023	<p>The IASB amended IAS 1 to require entities to disclose their material rather than their significant accounting policies. The amendments define what is 'material accounting policy information' and explain how to identify when accounting policy information is material.</p> <p>They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information. To support this amendment, the IASB also amended IFRS Practice Statement 2 <i>Making Materiality Judgements</i> to provide guidance on how to apply the concept of materiality to accounting policy disclosures.</p> <p>The amendments are not expected to have a significant impact on the Company's financial statements.</p>
Amendments to IAS 8	<i>Definition of Accounting Estimates</i>	January 2020	1 January 2023	<p>The amendment to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors clarifies how companies should distinguish changes in accounting policies from changes in accounting estimates.</p> <p>The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, whereas changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period.</p> <p>The amendments are not expected to have a significant impact on the Company's financial statements.</p>
Amendments to IAS 12	<i>Deferred Tax related to Assets and Liabilities arising from a Single Transaction</i>	January 2020	1 January 2023	<p>The amendments to IAS 12 Income Taxes require companies to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. They will typically apply to transactions such as leases of lessees and decommissioning obligations, and will require the recognition of additional deferred tax assets and liabilities.</p> <p>The amendment should be applied to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that it is probable that they can be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with:</p> <ul style="list-style-type: none"> - right-of-use assets and lease liabilities, and - decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets. <p>The cumulative effect of recognising these adjustments is recognised in retained earnings, or another component of equity, as appropriate. IAS 12 did not previously address how to account for the tax effects of on-balance sheet leases and similar transactions and various approaches were considered acceptable.</p> <p>The amendments are not expected to have a significant impact on the Company's financial statements.</p>

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

4.1 Foreign currency transactions

Transactions denominated in foreign currencies are translated at the exchange rate on the transaction date. At each reporting date, monetary assets and liabilities are translated at the closing rate. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency translated at the exchange rate at the date of the transaction. Exchange differences are recognised in profit or loss on a net basis as "Other income" (net foreign exchange gain) or "Other expenses" (net foreign exchange loss).

4.2 Revenue and other income

(i) Revenue recognition

The Company accounts for contracts within the scope of IFRS 15 'Revenue from contracts with customers' when a contract has been approved by both parties, each party's rights have been clearly identified, payment terms have been clearly identified, the contract has commercial substance and it is probable that the Company will collect the consideration it is entitled to for the transfer of refined petroleum products and lubricants to the customer.

Definition of customer

A customer is a party that has contracted with the Company to obtain refined petroleum products and lubricants that are an output of the Company's ordinary activities in exchange for consideration. A counterparty would not be a customer if it has entered into a contract to share in the risk and benefits that result from the activity or process.

Revenue streams

The Company generates revenue primarily from the sale of refined petroleum products and lubricants to its customers (see note 6). Other sources of revenue include sale of special fluids and solar products.

Performance obligations and revenue recognition policies

Revenue is measured based on the consideration specified in a contract with a customer. The Company recognises revenue when it transfers control over a good or service to a customer. Revenue from the sale of non-regulated products in the course of ordinary activities is measured at the fair value of the received consideration or receivable, net of value added tax, sales returns, trade discounts and volume rebates where applicable. Revenue for regulated products is measured at the regulated price of the products net of standard distribution cost directly recoverable from the prices of the regulated products.

The following table provides information about the timing of the satisfaction of performance obligations in contracts with customers, including significant payment terms, and the related revenue recognition policies.

Nature and timing of satisfaction of performance obligations, including significant payment terms.	Revenue recognition policies
Customers obtain control of products when the goods are delivered to and have been accepted at their premises or picked up by the customer. Invoices are generated and revenue is recognised at that point in time. Credit sales are due for collection within 30 days. This applies to all sales products.	Revenue is recognised when the goods are delivered and have been accepted by customers at their premises or picked up by the customer.

Transaction price

Transaction price is the amount allocated to the performance obligations identified in the contract. It represents the amount of revenue recognised as those performance obligations are satisfied. Complexities may arise where a contract includes variable consideration, significant financing component or consideration payable to a customer.

Financing component

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the group does not adjust any of the transaction prices for the time value of money.

Contract assets and liabilities

The Company recognises contract assets for unbilled revenue from lubricant sales and sales of refined petroleum products. The Company recognises contract liability for consideration received for which performance obligation has not been met.

Disaggregation of revenue from contract with customers

The Company derives revenue from two types of products, lubricants and refined petroleum products. The Company has determined that the disaggregation of revenue based on the criteria of type of products meets the disaggregation of revenue disclosure requirement of IFRS 15.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.2 Revenue and other income (cont'd)

(ii) Other income

The Company recognises income from commission on sales at its bonjour shops as well as the rental of some of its space. The period of occupancy is the basis upon which rental income is recognised and the lease term is usually for 12 months. Rental income are for short term leases and are recognised in profit or loss on a straight line basis over the term of the lease.

4.3 Finance income and finance costs

The Company's finance income comprises interest income on bank balances and advances to employees. Interest income on bank balances and advances to employees, is recognised as it accrues in profit or loss, using the effective interest method.

Finance costs comprise interest expense on lease liabilities, import loans, bank overdrafts and other staff loans. Interest expenses are recognised in profit or loss using the effective interest method.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

4.4 Income taxes

Income tax expense comprises current tax (company income tax, tertiary education tax and Nigeria Police Trust Fund levy) and deferred tax movement. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

The Company had determined that interest and penalties relating to income taxes, including uncertain tax treatments, do not meet the definition of income taxes, and therefore are accounted for under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

Current taxes

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year, and any adjustment to tax payable or receivable in respect of previous years.

The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date and is assessed as follows:

- Company income tax is computed on taxable profits (i.e the assessable profit after capital allowances (tax depreciation) and brought forward losses (if any) have been considered).
- Tertiary education tax is computed on assessable profits (i.e the profit of the Company that is liable to tax after exempting non-taxable income and subjecting to tax, expenses which were not wholly, reasonably, exclusively or necessarily incurred for the operations of the Company, but before the consideration of capital allowances and losses).
- Nigeria Police Trust Fund levy is computed on net profit (i.e. profit after deducting all expenses and taxes from revenue earned by the company during the year).

- The National Agency for Science and Engineering Infrastructure (NASENI) levy is computed on net profit (i.e. profit after deducting all expenses and taxes from revenue earned by the company during the year).

Total amount of tax payable under CITA is determined based on the higher of two components namely Company Income Tax (based on taxable income (or loss) for the year); and minimum tax. Taxes based on profit for the period are treated as income tax in line with IAS 12.

Minimum tax

Minimum tax which is based on a gross amount is outside the scope of IAS 12 and therefore, are not presented as part of income tax expense in the profit or loss.

In line with the Finance Act 2021, minimum tax is determined at a base rate of 0.25% (2020: 0.25%) of the qualifying company's gross turnover less franked investment income. The Finance Act defines gross turnover as the gross inflow of economic benefits (cash, revenues, receivables and other assets) arising from the operating activities of a Company, including sales of goods, supply of services, receipt of interest, rents, royalties or dividends.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.4 Income taxes (cont'd)

Where the minimum tax charge is higher than the Company Income Tax (CIT), a hybrid tax situation exists. In this situation, the CIT is recognised in the income tax expense line in the profit or loss and the excess amount is presented above the income tax line as minimum tax.

The Company offsets the tax assets arising from withholding tax (WHT) credits and current tax liabilities if, and only if, the entity has a legally enforceable right to set off the recognised amounts, and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. The tax asset is reviewed at each reporting date and written down to the extent that it is no longer probable that future economic benefit would be realised.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences.

If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans of the Company. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date, and reflects uncertainty related to income taxes, if any.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met. The Company has the legal right to settle current tax amounts on a net basis as the deferred tax amounts are levied by the same tax authority.

Accounting for uncertain tax treatments under IFRIC 23

The Company's judgements with respect to income taxes are based on the likelihoods that the tax authority will accept an uncertain tax treatment that has been taken or is expected to be taken on its tax returns. The Company specifically reviews whether its tax treatments are consistent with requirements and recommendations of tax laws while ensuring its proper coverage of avoidable tax risks and exposures in the process.

The Company measures the impact of the uncertainty using the method that best predicts the resolution of the uncertainty; either the most likely amount method or the expected value method. Furthermore, the judgements and estimates made to recognise and measure the effect of uncertain tax treatments are reassessed whenever circumstances change or when there is new information that affects those judgements.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.5 Earnings per share (EPS)

i Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year, adjusted for bonus elements in ordinary shares issued during the year.

ii Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of Basic earnings per share to take into account the weighted average number of additional shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

4.6 Property plant and equipment

i Recognition, derecognition and measurement

Property, plant and equipment are measured at cost, less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment shall be recognised as an asset if;

- it is possible that future economic benefits associates with the item will flow to the entity; and
- the cost of the item can be measured reliably.

Property, plant and equipment under construction are disclosed as work in progress. The cost of self-constructed assets includes the cost of materials, direct labour and any other costs directly attributable to bringing the asset to a working condition for their intended use including, where applicable, the cost of dismantling and removing the items and restoring the site on which they are located and borrowing costs on qualifying assets.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised in profit or loss.

Property, plant and equipment are derecognised on disposal or when it is withdrawn from use and no future economic benefits are expected from its disposal.

ii Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

iii Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss.

Depreciation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

Property, plant and equipment are depreciated to their residual values using the straight-line method over their useful lives for current and comparative periods as follows:

Type of asset	Useful lives
· Motor vehicles	5 years
· Office equipment and furniture	4 years
· Computer equipment and other tangibles	4 - 20 years
· Plant, machinery and fittings	3 - 30 years
· Buildings	10 - 25 years
· Land	Not depreciated

Capital work in progress is not depreciated. The attributable cost of each asset is transferred to the relevant asset category immediately the asset is available for use and depreciated accordingly.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.7 Intangible assets

i Recognition and measurement

Intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets are computer software and software licenses. These are capitalised on the basis of acquisition costs as well as costs incurred to bring the assets to use.

Intangible assets are derecognised upon sale. The gain or loss arising from the derecognition of an intangible asset shall be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the asset.

ii Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific intangible asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

iii Amortisation of intangible assets

Amortisation is calculated on the cost of the asset, or other amount substituted for cost, less its estimated residual value. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Computer software and software licences have estimated useful lives of 3 to 5 years.

Amortisation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

4.8 Dividend payable

An accrual is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the Company, on or before the end of the reporting period but not distributed at the end of the reporting period.

Any accrual made in respect of dividend payable is recognised as a deduction from equity.

4.9 Impairment

i Non-derivative financial assets

Financial instruments

The Company recognises loss allowances for Expected Credit Losses (ECLs) on financial assets measured at amortised cost. The company also recognises loss allowances for ECLs on employee loan receivables which are disclosed as part of trade and other receivables. (See note 19)

The Company measures loss allowances at an amount equal to lifetime ECLs, except for bank balances, lease and loan receivables for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition, which are measured at 12-month ECLs. Loss allowance for trade receivables are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 90 days past due.

The Company's credit terms to customers vary from 30 days to 90 days depending on the nature of industry, customer preferences and negotiation. Based on the logistics, distribution and operational dynamics of our major customers, the significant increase credit risk threshold is set at 90 days.

The company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held).
- balances are over 360 days past due in line with the Company's provisioning matrix.

The Company applies simplified approach to determine impairment of trade receivables. The three-stage model is applied to cash and cash equivalent.

The simplified approach requires expected lifetime losses to be recognised from initial recognition of the trade receivables. This involves determining the expected loss rates using a provision matrix that is based on the Company's historical default rates observed over the expected life of the trade receivables and adjusted forward-looking estimates. This is then applied to the gross carrying amount of the trade receivables to arrive at the loss allowance for the period.

The three-stage approach assesses impairment based on changes in credit risk since initial recognition using the past due criterion and other qualitative indicators such as increase in political concerns or other macroeconomic factors and the risk of legal action, sanction or other regulatory penalties that may impair future financial performance.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.9 Impairment (cont'd)

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 360 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisation.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For customers, the Company makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

ii Non financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash flows from continuing use that are largely independent of the cash flows of other assets or Cash Generating Units (CGUs).

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognised in profit or loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

4.10 Financial instruments

i Recognition and initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

The Company does not have any financial assets measured at FVOCI or FVTPL.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.10 Financial instruments (cont'd)

ii Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cashflows.
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Asset at Fair value through OCI (FVOCI)

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses, which are recognised in profit or loss.

When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses), and impairment expenses are presented as separate line item in the statement of profit or loss.

The Company has no debt instruments within this category.

All financial assets not classified as measured at amortised cost or fair value through other comprehensive income (FVOCI) are measured at FVTPL. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets - Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfer of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose consistent with the company's continuing recognition of the assets.

Financial assets that are held for trading or are merged and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.10 Financial instruments (cont'd)

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets – Subsequent measurement and gains and losses

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost, net of impairment is recognised in the statement of financial position. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss. The Company does not have any financial liabilities measured at FVTPL.

iii Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset. The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

iv Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.11 Share capital

The Company has only one class of shares namely ordinary shares. Ordinary shares are classified as equity. When new shares are issued, they are recorded in share capital at their par value. The excess of the issue price over the par value is recorded in the share premium reserve.

Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

When shares recognised as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognised as a deduction from equity.

4.12 Statement of cash flows

The statement of cash flows is prepared using the indirect method. Dividends paid to ordinary shareholders are included in financing activities. Interest paid is also included in financing activities while interest received is included in investing activities. Interest received on employee loans and receivables, foreign exchange differential, interest claim on Petroleum Support Fund (PSF) and Interest on lease liabilities are included in operating activities.

4.13 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash balances with commercial banks and Total Treasury as well as call deposits with original maturities of three months or less. Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows. Bank overdrafts are shown within borrowings in current liabilities on the statement of financial position.

4.14 Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of blended products/lubricants includes an appropriate share of production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses. Inventory values are adjusted for obsolete, slow-moving or defective items.

The basis of costing inventories based on the product types are as follows:

Product Type	Cost Basis
Refined Petroleum Products (AGO, ATK, PMS, DPK, LPFO)	First In First Out (FIFO) (2022: Weighted Average Cost)
Packaging Materials, Solar Lamps, Lubricants, Greases, Special fluids and Car care products	Weighted Average Cost
Inventories-in-transit	Total purchase cost incurred at transaction date

4.15 Provisions

Provisions comprise liabilities for which the amount and the timing are uncertain. They arise from environmental risks, legal and tax risks, litigation and other risks. A provision is recognised when the Company has a present obligation (legal or constructive) as a result of a past event for which it is probable that an outflow of resources will be required and when a reliable estimate can be made regarding the amount of the obligation. Provisions are determined by discounting the expected future cash flow at a pre-tax rate that reflects current market assessment of the value and the risk specific to the liability. The unwinding of the discount is recognised in profit or loss as a finance cost.

However, possible obligations depending on whether or not certain future events occur are disclosed as contingent liabilities.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.16 Employee benefits

Post-employment benefit

(a) Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

In line with the provisions of the Pension Reform Act 2014, the Company has instituted a defined contribution pension scheme for its permanent staff. Employees contribute 8% of their Basic salary, Transport and Housing Allowances to the Fund on a monthly basis. The Company's contribution is 10% of each employee's Basic salary, Transport and Housing Allowances. Staff contributions to the scheme are funded through payroll deductions while the Company's contribution is recognised in profit or loss as staff costs in the periods during which services are rendered by employees.

(b) Defined benefit plan

i Gratuity scheme

The Company operates a gratuity scheme for its employees in service before January 2001. This is funded by the Company on a monthly basis, at a rate of contribution of 9.5% of total annual emolument and paid to Fund Managers chosen by each employee. The Company's obligation are extinguished once the amounts have been transferred to the Fund Managers.

ii Other long-term employee benefits

The Company's other long-term employee benefits represents a Long Service Award scheme for a minimum milestone of ten (10) years and the Total home ownership scheme (TEHOS) which is a one-off payment upon tenth anniversary. These schemes are instituted for all permanent employees. The Company's obligations in respect of these schemes are the amounts of future benefits that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value. The liability duration of the scheme is estimated at 3.13 years. The Company has compared this with the Macaulay duration of the closest Federal Government of Nigeria bonds as at 30th December 2022 which were 2.91 years with a gross redemption yield of about 13.93% and 3.43 years with a gross redemption yield of about 12.92%. Thus, we adopted a discount rate of 13.5%. The calculation is performed using the Projected Unit Credit method. Remeasurements are recognised in profit or loss in the period in which they arise. This Scheme is not funded. The obligations are paid out of the Company's cash flows as and when due.

iii Termination benefits

Termination benefits are expensed at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognises costs for a restructuring. If benefits are not expected to be settled wholly within 12 months of the end of the reporting period, then they are discounted.

iv Post-employment medical services

The Company's post-retirement medical coverage is for five (5) years (2022: 7 years) on early retirement or eight (8) years on normal retirement (i.e. at the retirement age of 60 years). This scheme is instituted for all permanent employees and is provided after the completion of employment via the Health Insurance Scheme offered third party providers. The Company's exposure under this arrangement is limited to premium payable to the providers. The benefit is discounted to determine its present value. return for their service in the current and prior periods. The benefit is discounted to determine its present value. The discount rate is a result of the Company's objective to ensure underlying cost inflation remains below country headline inflation having considered the weighted average of five (5) years yield on Federal Government of Nigeria issued bonds that have maturity dates approximating the term of the Company's obligation. The calculation is performed using the Projected Unit Credit method. Remeasurements which comprise actuarial gains or losses are recognized in other comprehensive income in the period in which they arise. Net interest expense and other expenses related to the post employment benefits are recognised in profit or loss. This Scheme is not funded. The obligations are paid out of the Company's cash flows as and when due.

Other benefits

i Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

4.17 Government grant

Petroleum Products Pricing Regulatory Agency (PPPRA) subsidises the cost of importation of certain refined petroleum products whose prices are regulated in the Nigerian market. The subsidies are recognised when there is reasonable assurance that they will be recovered and the Company has complied with the conditions attached to receiving the subsidy. The subsidies are recognised as a reduction to the landing cost of the subsidised petroleum product in the year in which the Company makes the determination that all conditions have been met and the amount will be recovered. Where the amounts relate to interest and foreign exchange differentials, they are recognised in profit or loss when there is reasonable assurance that the amounts will be recovered.

4.18 Operating Profit

Operating profit is the result generated from the continuing principal revenue producing activities of the Company as well as other income and expenses related to operating activities. Operating profit excludes net finance costs and income taxes.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.19 Measurement of fair values

Some of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. The Final Account Manager (FAM) has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the Board of Directors.

The FAM regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the FAM assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified. Significant valuation issues are reported to the Audit Committee and the Board of Directors.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs)

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

4.20 Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

A. As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased. Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The Company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

Short-term leases

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

4.20 Leases (cont'd)

B. As a lessor

The Company leases out trucks to its transporters and these are classified as finance leases.

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease.

As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset. When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset.

If a head lease is a short-term lease to which the Company applies the exemption described above, then it classifies the sub-lease as an operating lease. If an arrangement contains lease and non-lease components, then the Company applies IFRS 15 to allocate the consideration in the contract.

The Company applies the derecognition and impairment requirements in IFRS 9 to the net investment in the lease and regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease. The Company recognises lease payments received under operating leases as income on a straightline basis over the lease term as part of 'other income'.

Generally, the accounting policies applicable to the Company as a lessor in the comparative period were not different from IFRS 16 except for the classification of the sub-lease entered into during current reporting period that resulted in a finance lease classification.

5 Seasonality and Segment Reporting

Seasonality of Operations

The Company's operations are such that revenue and cost are not affected by the impact of seasonality.

Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The Board has given the Company's Chief Executive Officer (CEO) the power to assess the financial performance and position of the Company, allocate resources and make strategic decisions. Segment reports that are reported to the CEO includes items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Products and services from which reportable segments derive their revenues

Information reported to the Company's CEO for the purposes of resource allocation and assessment of segment performance is focused on the sales channels for the company's products (petroleum products, lubricants and others). The principal sales channels are Network, General Trade and Aviation. The Company's reportable segments under IFRS 8 are therefore as follows: Network, General Trade and Aviation.

The following summary describes the operations of each reportable segment.

Reportable Segment	Operations
Network	Sales to service stations
General Trade	Sales to corporate customers excluding customers in the aviation industry
Aviation	Sales to customers in the aviation industry

Segment revenue reported below represents revenue generated from external customers. There were no inter-segment sales in the current period (2022: nil). Performance is measured based on segment which correspond with IFRS amounts in the Financial Statement.

NOTES TO THE FINANCIAL STATEMENTS

11 Company Income Tax

Income tax expense

The tax charge for the period has been computed after adjusting for certain items of expenditure and income, which are not deductible or chargeable for tax purposes and comprises:

Minimum Tax

The Company has applied the provisions of the Companies Income Tax Act and the Finance Act 2021 that mandates a minimum tax assessment, where a tax payer's tax liability based on taxable profit is less than the minimum tax liability. The Company's assessment based on the minimum tax legislations for the period ended 30 September 2023 is nil (30 September 2022: nil) See note 11.1.3.

The Directors believe that the tax liabilities recognised represents best estimate based on their interpretation of the tax law.

Analysed as:		
Current	-	-
Non-current	1,843,948	1,551,290
	1,843,948	1,551,290

Employee benefits represents the Company's liability for:

- Long service awards - Staff who have attained the milestones for the specified number of years of service in the Company (i.e. 10 years, 15 years and 20 years) are rewarded with cash and gift items as long service awards.
- Home ownership scheme - Under the home ownership scheme, qualifying staff are entitled to a grant which is a one-off payment upon tenth anniversary.
- Post employment medical benefits - A post-retirement medical coverage is extended to ex-staff for five (5) years on early retirement or eight (8) years on normal retirement (i.e. at the retirement age of 60 years) as well as two (2) years for dependent relatives of a deceased staff. The liability duration of this scheme is estimated at 9.72 years.

i. Movement in net defined benefit liability

The following table shows a reconciliation from the opening balances to the closing balances for the net defined benefit liability and its components.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

12 Employee benefits (cont'd)

(a) Allocation of employee benefits provisions during the period

Amount recognised in profit or loss (Note 10.2.3)	326,496	551,034
Amount recognised in other comprehensive income	-	9,435
	<u>326,496</u>	<u>560,469</u>

Actuarial Assumptions

The following were the principal actuarial assumptions at the reporting date (expressed as weighted averages).

	<u>2023</u>	<u>2022</u>
Discount rate		
- Long service awards	13.5%	13.5%
- Home ownership scheme	13.0%	13.0%
- Post employment medical services	13.5%	13.5%
Inflation rate	15.0%	15.0%
Future salary growth	10.0%	10.0%
Benefit increase rate		
- Long service awards	13.0%	13.0%
- Home ownership scheme	6.5%	6.5%
- Post employment medical services	<u>6.5%</u>	<u>6.5%</u>

The Company is exposed to several risks arising from the defined benefits plan. The most significant of which are inflation risk, changes in bond yields and life expectancy.

The assumptions below further depict management's estimate of the likely future experience of the Company.

Demographic assumptions

Withdrawal Rates

	<u>2023</u>	<u>2022</u>

<i>Interim dividend:</i>		
₦0.00 per qualifying ordinary share (2022: ₦4.00)	-	1,358,087
	<u>7,129,959</u>	<u>7,537,384</u>

13.1 Dividend payable

	<u>30 September 2023</u>	<u>31 December 2022</u>
	<u>₦'000</u>	<u>₦'000</u>
Balance as at 1 January	6,014,629	2,248,093
Final dividend (prior year)	7,129,959	6,179,297
Interim dividend (current year)	-	1,358,087
	13,144,588	9,785,477
Forfeited dividend (Note 13.1(a))	-	(92,881)
Dividend paid	(7,131,328)	(3,677,967)
Balance as at 30 September	<u>6,013,260</u>	<u>6,014,629</u>

(a) By the provision of Section 429 of the Companies and Allied Matters Act (CAMA), 2020, where dividends paid by a company remain unclaimed, the company shall publish in two national newspapers, a list of the unclaimed dividends and the names of the persons entitled to the dividends, and attach the list, as published in the national newspapers, to the notice that is sent to the members of the company for each subsequent annual general meeting of the company.

After the expiration of three months of the publication and notice, the company may invest the unclaimed dividend for its own benefit in investments outside the company and no interest shall accrue on the dividends against the company.

However, Section 60 (3) of the Finance Act 2020 provides that dividends of a public limited liability company quoted on the Nigerian Stock Exchange which has remained unclaimed for a period of six years or more from the date of declaring the dividend shall be immediately transferred to the Unclaimed Funds Trust Fund.

14 Earnings per share (EPS)

Basic earnings per share

Basic earnings per share of ₦31.87 (2022: ₦36.83) is based on profit attributable to ordinary shareholders of ₦10.8 billion (2022: ₦12.5 billion), and on the 339,521,837 ordinary shares of 50 kobo each, being the weighted average number of ordinary shares in issue during the year (2022: 339,521,837 ordinary shares).

The Company has no dilutive potential ordinary shares and as such, diluted and basic earnings per share are the same.

	<u>30 September 2023</u>	<u>30 September 2022</u>
Earnings		
Profit for the period attributable to shareholders (expressed in Naira)	10,820,699,739	12,505,812,000
Number of shares		
Weighted average ordinary shares of 50 kobo each	339,521,837	339,521,837
Basic profit per 50 kobo share (expressed in Naira)	<u>31.87</u>	<u>36.83</u>

The denominators for the purposes of calculating basic earnings per share are based on issued and paid ordinary shares of 50 kobo each as at 30 September 2023.

15 Intangible assets

The movement on these accounts were as follows:

No item of property, plant and equipment has been restricted or pledged as security.

16.1 Transfers represent additions to other categories of PPE as well as from prior period's work-in-progress as they become completed.

Capital work in progress (CWIP) items include construction and other tangible asset awaiting completion. Major additions relate to upgrade of depot, acquisition of computer hardware, generators, motor vehicles, upgrade of information technology infrastructure, structural and civil upgrade of stations as well as integrity test of multi-product pipeline. Included in transfers out of CWIP are intangible items and right-of-use assets for which lease arrangements were finalised.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

17 Company as a lessee (IFRS 16)

The Company leases service stations, storage facilities and staff buses. Service station leases typically run for a period of 10 years, with an option to renew the lease after that date. Option to renew is not legally enforceable as it is not unilateral and requires the consent of both parties. See note 17 (iv). Storage facilities leases runs for 5 years. Staff bus leases typically run for 5 years which is the useful life of the asset.

Service station leases entered into are usually combined leases of land and buildings. The Company leases residential spaces with contract terms of one year. These leases are short term. The renewal option of these residential spaces are mostly at the sole instance of the Company. The renewal of these spaces is based on them fulfilling the business needs of the Company per time. The Company has elected not to recognise right-of-use assets and lease liabilities for these leases. Lease payments on these short-term leases are recognised as expense on a straight-line basis over the lease term. Information about leases for which the Company is a lessee is presented below:

i. Right-of-use assets

Right-of-use assets related to leased properties that do not meet the definition of investment property are presented as a separate line item on the statement of financial position.

	Leasehold buildings	Motor vehicles	Storage facilities	Total

	N'000	N'000
Additions to right-of-use assets	(1,384,608)	(2,199,045)

iv. Extension options

The Company's service station lease agreements contain extension options exercisable by the Company. Where practicable, the Company seeks to include extension options in its leases to provide operational flexibility. The extension options held are exercisable only by the Company but require the consent of the lessors. The Company assesses at lease commencement date whether it is reasonably certain to exercise the extension options because the Company usually prepays its station leases for about 7 -10 years and due to the fact that the decision to renew is usually based on the results of an economic evaluation of each individual service station's performance to determine if it is financially viable to extend the lease. The directors have concluded that it is not reasonably certain at commencement of the leases to determine whether or not the leases will be renewed.

The Company has estimated that there are no potential future lease payments as its current assessment is that it is not probable that the lease extension option would be exercised.

The Company also estimates that obligations arising from termination of the lease are insignificant as moveable assets are reassigned to other locations at minimal transport costs while immovable assets are expected to be fully depreciated at the end of the lease term.

Foreign exchange impact on trade and other receivables (See note 8.2)	(2,677,826)	(3,839,559)
Amount recognised in statement of cashflows	<u>(84,817,470)</u>	<u>(46,678,474)</u>

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

19.1.1 Finance lease receivable

The Company leases transport equipment to some of its transporters under a finance lease arrangement. The lease term is between three to five years, with options to extend. The finance lease receivables at the end of the reporting period are neither past due nor impaired. The carrying amount of the finance lease receivables approximates their fair value and may be analysed as follows:

	30 September 2023	31 December 2022
	N'000	N'000
Gross investment in finance lease receivable	204,689	412,456
Unearned finance income	(18,204)	(36,681)
Net investment in finance lease	<u>186,485</u>	<u>375,775</u>
Net investment in finance lease	30 September 2023	31 December 2022
	N'000	N'000
Current:		
Less than one year (note 19)	33,094	66,686
Non current:		
Between one and five years (note 19.1)	110,903	223,473
More than five years	42,488	85,616
	<u>186,485</u>	<u>375,775</u>

19.1.2 Leases as lessor

The Company has lease arrangements with its transporters consisting of leased trucks. These leases are classified as a finance lease.

(i) Finance lease

The following table sets out a maturity analysis of lease receivables, showing the undiscounted lease payments to be received after the reporting date.

	30 September 2023	31 December 2022
	N'000	N'000
Less than one year	38,426	77,430
One to two years	122,095	246,027
More than five years	44,167	88,999
Total undiscounted lease receivable	204,689	412,455

Balance at 31 December 2022	-	47,741,972	734,061	48,476,033

The principal features of the Company's borrowings are as follows:

- Bank overdrafts are repayable on demand.
- Trade finance loan represents short term borrowings obtained to fund letters of credits for product importation. The interest charged on these loans vary depending on the LIBOR or SOFR. The interest rate on these loans are usually between 7% to 14%.
- The Commercial paper instrument is a ₦30 billion programme established by TotalEnergies Marketing Nigeria Plc under which the company may from time to time issue Commercial Paper Notes, as may be agreed between the Arranger and the Issuer, in separate series or tranches. There is currently no issuance.
- Short term intercompany Loan represents an unsecured revolving loan facility with maximum cumulative draw down capped at \$300 million from TotalEnergies Upstream Nigeria Limited with a tenor of 1 year at Daily compounded SOFR + 6.5%
- The carrying amount of current borrowings is a reasonable approximation of fair value as at 30 September, 2023.

a. Terms and repayment schedule

The terms and conditions of loans and borrowings are as follows:

Currency	Nominal interest rate	Year of maturity	30 September 2023		31 December 2022		
			Face value	Carrying amount	Face value	Carrying amount	
			₦'000	₦'000	₦'000	₦'000	
Lease liabilities	NGN	16%	2020 - 2023	549,332	461,439	873,882	734,061
Short term intercompany	USD	Variable	2023	74,857,250	74,857,250	11,304,750	11,304,750
Bank overdraft	NGN	14.50%	-	57,617,753	57,617,753	-	-
Trade finance loan	NGN	Variable	2023	13,636,615	13,636,615	36,437,222	36,437,222
				<u>146,660,950</u>	<u>146,573,057</u>	<u>48,615,854</u>	<u>48,476,033</u>

The Company has discounted lease liabilities using incremental borrowing rate of 16% (2022: 16%) which represents the rate of interest that a lessee would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. There was no need to reassess the incremental borrowing rate in 2022.

Total trade and other payables	<u>206,524,629</u>	<u>190,091,170</u>
¹ Amount payable to PEF with respect to bridging activities on imported products. See note 30(iv) for more information.		
² Amount relates to collateral deposits paid by dealers who maintain credit facilities with the Company.		
³ Accrued liabilities principally comprise accrual for product bills and other charges for which invoices were not yet received at the end of the year.		
Trade and other payables principally comprise amounts outstanding for trade purchases and ongoing costs.		
The Directors consider that the carrying amount of trade payables as at 30 September 2023 approximates their fair value.		
Information about the Company's exposure to currency and liquidity risks is included in note 30(iii).		
(a) Reconciliation of changes in trade and other payables to statement of cashflows is as follows:		
	30 September 2023 N'000	30 September 2022 N'000
Balance at 1 January	(190,091,170)	(134,545,293)
Balance at 30 September	206,524,629	142,088,442
Movement in dividend payable (See note 13.1)	1,369	(2,819,907)
Foreign exchange impact on trade and other payables (See note 8.2)	(27,168,829)	3,141,301
Amount recognised in statement of cashflows	<u>(10,733,999)</u>	<u>7,864,543</u>
25 Deferred income	30 September 2023 N'000	31 December 2022 N'000
Contract liabilities	4,311,210	3,402,832
	<u>4,311,210</u>	<u>3,402,832</u>
(a) Reconciliation of changes in deferred income to statement of cashflows is as follows:		
	30 September 2023 N'000	30 September 2022 N'000

Balance at 30 September	4,311,210	3,319,325
Amount recognised in statement of cashflows	<u>908,378</u>	<u>250,334</u>
The deferred income represents amounts billed and collected in accordance with contractual terms in advance of when the goods are delivered or services rendered. These advance payments primarily relate to the rental income and contract liabilities. Contract liabilities primarily relate to the advance consideration received from customers for the sale of goods, for which revenue is recognised once the goods are delivered and have been accepted in the customers premises or picked up by the customer. The Company estimates this will be earned as revenue during the subsequent financial years.		
26 Share capital	30 September 2023 N'000	30 September 2022 N'000
Authorised, Issued and fully paid:		
339,521,837 ordinary shares of 50 kobo each	169,761	169,761
All ordinary shares rank equally with regard to the Company's residual assets. Holders of these shares are entitled to dividends as declared from time to time and are entitled to one vote per share at general meetings of the Company.		
27 Cash and cash equivalents	30 September 2023 N'000	30 September 2022 N'000

Cash & cash equivalents in statement of cash flows as at 31 December 2022		<u>82,724,315</u>
The Company classifies amounts held with TotalEnergies Treasury as cash and cash equivalents because they can be withdrawn at any time without penalties.		

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

28 Commitments and contingent liabilities

Financial commitments

The Company did not restrict or deposit any of its assets to secure liabilities of third parties.

The Directors are of the opinion that all known liabilities and commitments have been taken into account in the preparation of these financial statements. These liabilities are relevant in assessing the Company's state of affairs.

	30 September	31 December
	2023	2022
	₦'000	₦'000
Bonds		
Total commitments given	3,000,000	3,000,000
Total commitments received	1,700,000	1,800,000

Commitments given primarily include guarantee to Pipelines and Products Marketing Company Limited (PPMC) for bulk purchase of petroleum products. No losses are anticipated in respect of these.

Commitments received include customers' guarantees.

Commitments received and given are held with local banks.

At 30 September 2023, the Company had contractual commitments (given) for the acquisition of property, plant and equipment amounting to ₦2.62 billion (2022: ₦1.40 billion).

Contingent liabilities

There are contingent liabilities in respect of legal actions against the Company amounting to approximately ₦1.257 trillion (2022: ₦1.257 trillion). The Directors have not made provisions for these contingent liabilities as consultations have been made with the in-house legal team led by Olubunmi Popoola-Mordi - (FRC/2013/ICSAN/00000002042). The in-house legal team holds regular discussions and obtains expert opinion from the Company's external solicitors (on a need basis). Based on all information available as at date of issue of these financial statements (including historical reference of these cases), The directors, based on the advice of the in-house legal team have concluded that no material losses will crystallise against the Company.

29 Capital management

The Company manages its capital to ensure that the Company will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of its debt and equity balance. The Company's overall strategy remains unchanged from prior year.

The capital structure of the Company consists of debt, which includes the borrowings disclosed in note 21, cash and cash equivalents and equity attributable to equity holders, comprising issued capital, reserves and retained earnings.

The Company is not subject to any externally imposed capital requirements.

Gearing ratio

Gearing ratio is net debt to equity ratio.

	30 September	31 December
	2023	2022
	₦'000	₦'000
Borrowings (note 21)	57,617,866	47,741,972
Cash and cash equivalents (note 27)	(118,982,171)	(82,724,315)
Lease liabilities (note 22)	694,735	734,061
Net debt (calculated)	(60,669,570)	(34,248,282)
Net debt (restricted to a minimum of zero)	-	-
Equity	53,977,551	50,286,810
Net debt to equity ratio	0:1	0:1

Net debt is expressed as an aggregate of lease liabilities, long and short-term borrowings less cash and cash equivalents. The net debt applied in determining the net debt to equity ratio has been restricted to a minimum of zero. The negative position of the calculated net debt is as a result of increased cash and cash equivalent position during the period.

Equity includes all capital and reserves of the Company that are managed as capital.

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

30 Financial risk management

(i) Financial risk management objectives

The Company's Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyses exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk), credit risk and liquidity risk.

The Company's Treasury function reports monthly to the Group's Treasury, a section of the Group that monitor's risk and policies implemented to mitigate risk exposures.

(ii) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Interest rate risk management

The Company is exposed to interest rate risk as it borrows funds at multiple interest rates. The risk is managed by the Company by constantly negotiating with the banks to ensure that interest rates are consistent with the monetary policy rates as defined by the Central Bank of Nigeria.

Interest rate risk

Sensitivity analysis

At the reporting date the interest rate profile of the Company's interest-bearing financial instruments was:

	<u>30 September</u> <u>2023</u> ₦'000	<u>31 December</u> <u>2022</u> ₦'000
Variable rate instruments		
Borrowings (note 21)	146,111,618	47,741,972
	<u>146,111,618</u>	<u>47,741,972</u>

Sensitivity analysis for variable rate instruments

A reasonable possible change of 1000 basis points in interest rates at the reporting date would have increased (decreased) profit or loss by the amounts below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

	<u>30 September</u> <u>2023</u> ₦'000	<u>31 December</u> <u>2022</u> ₦'000
Effect of 10% increase on interest rates (2022: 10%)	(14,611,162)	(4,774,197)
Effect of 10% decrease on interest rates (2022: 10%)	14,611,162	4,774,197

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

30 Financial Risk Management (cont'd)

Currency risk management

The Company is exposed to transactional foreign currency risk to the extent that there is a mismatch between the currencies in which sales, purchases, receivables and borrowings are denominated and the respective currencies of the Company. The functional currency of the Company is the Nigerian Naira. The Company also transacts in United States Dollars (USD), Euros and Swiss Franc (CHF).

A movement in the exchange rate either positively or negatively by 30 percent is illustrated below. Such movements would have increased (decreased) the profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the end of the reporting year. The analysis assumes that all other variables, in particular interest rates, remain constant.

As at 30 September 2023

	Foreign currency '000	Naira balance '000	Exchange rate	Effect of increase/decrease in exchange rate	₦'000
Trade receivables					
USD	-	-	769.88	'30%	-
Cash deposits

Trade payables					
USD	(1,204)	(926,936)	769.88	'30%	(278,081)
EURO	(1,886)	(1,584,033)	839.89	'30%	(475,210)
CHF	(80)	(54,944)	686.81	'30%	(16,483)
Net impact on profit or loss					
USD	117,930	90,791,948	769.88	30%	27,237,584
EURO	(870)	(730,704)	839.89	30%	(219,212)
CHF	(80)	(54,944)	686.81	30%	(16,483)

As at 31 December 2022

	Foreign currency '000	Naira balance '000	Exchange rate	Effect of increase/decrease in exchange rate	₦'000
Trade receivables					
USD	2,022	914,328	452.19	'30%	274,298
Cash deposits					
USD	65,414	29,579,557	452.19	'30%	8,873,867
EURO	658	313,636	476.65	'30%	94,091
Trade payables					
USD	(27,121)	(12,263,845)	452.19	'30%	(3,679,153)
EURO	(1,041)	(496,193)	476.65	'30%	(148,858)
CHF	(98)	(43,786)	446.80	'30%	(13,136)
Net impact on profit or loss					
USD	40,315	18,230,040	452.19	30%	5,469,011
EURO	(383)	(182,557)	476.65	30%	(54,768)
CHF	(98)	(43,786)	446.80	30%	(13,136)

A decrease in exchange rate by 30 percent (2022: 30 percent) against the above currencies at the reporting year would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

*These exchange rates have been derived by computing the weighted average of the CBN intervention rate, bank rate, and NAFEX which represents the Company's expected pattern of realisation and settlement.

The following exchange rates were applied during the year:

	Average rate		Reporting date spot rate	
	2023	2022	2023	2022
USD	604.95	444.92	769.88	452.19
EURO	653.74	467.45	839.89	476.65
CHF	544.94	442.21	686.81	446.80

Total facilities	<u>99,000,000</u>	<u>99,000,000</u>

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

Financial Risk Management (cont'd)

(iv) Credit risk management

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables from customers, employees and the government. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate e.g. security deposits, as a means of mitigating the risk of financial loss from defaults. The Company uses other publicly available financial information and its own trading records to rate its major customers. Credit exposure is controlled by setting credit limits that are routinely reviewed and approved by management.

The Company obtains bank guarantees in its favour for transactions with certain customers. These guarantees are held with Nigerian banks as a form of security in the event of a default.

The Company does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The Company defines counterparties as having similar characteristics if they are related entities.

The credit policy of TotalEnergies Marketing Nigeria Plc. is set in accordance with the sales channel that the Customer belongs to:

Network Channel: Credit is extended to dealers who operate the Company Owned, Dealer Operated Service Station (CODO) and some of the Dealer Owned, Dealer Operated service stations (DODO) who specifically apply to operate under the DODO credit scheme. Under both CODO and DODO credit schemes, credit is extended to each dealer to cover the working capital needs of the station. Each day's sales proceeds are lodged into the Company's bank accounts at least twice daily. The Company's financial risk exposure is covered by retentions from dealers income to increase the security deposit, as well as retention of title over physical stock in the station in the event of non-payment.

General Trade (GT) Channel: Credit for the GT customers is set at the monthly average sales to the customer for a year of one year or six months after proper financial and qualitative analysis. The approved credit limit is extended for 30 days or 45 days in rare occasions for blue chip companies.

Aviation Channel: Most of the customers are on a cash and carry basis with the exception of a few companies with 15 days credit limit. Credit is given only after a year of three months sales to the customer. Sales to international customers are based on a contract of one year and credit amount is based on expected turnover. Sales to international customers are guaranteed by Air Total International, a related party and the risk of loss in this circumstance is nil.

Cash and cash equivalents

The Company held cash and cash equivalents of ₦118.98 billion (net of cash on hand) at 30 September 2023 (2022: ₦98.48 billion) with banks and financial institutions with high credit ratings, rated B to AAA based on the Fitch rating agency and TotalEnergies treasury.

Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short-term maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties. The Company did not record any ECL impairment for the period. (2022: Nil).

Trade and other receivables

A summary of the Company's exposure to credit risk for trade receivables is as follows:

As at 30 September 2023

	<u>Not Credit Impaired</u>	<u>Credit Impaired</u>	<u>Total</u>
	<u>₦'000</u>	<u>₦'000</u>	<u>₦'000</u>
Trade receivables	<u>69,086,850</u>	<u>721,729</u>	<u>68,365,121</u>

As at 31 December 2022

	<u>Not Credit Impaired</u>	<u>Credit Impaired</u>	<u>Total</u>
	<u>₦'000</u>	<u>₦'000</u>	<u>₦'000</u>
Trade receivables	<u>42,158,180</u>	<u>801,640</u>	<u>41,356,540</u>

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

Financial Risk Management (cont'd)

The maximum exposure to financial assets at the reporting date by type of counterparty was:

	30 September 2023	31 December 2022
	₦'000	₦'000
Customers	63,093,824	40,676,792
Due from related parties	5,271,297	679,748
Due from regulators (Government entities)	22,670,704	19,353,265
Other receivables	2,580,651	1,020,788
Trade and other receivables (Non-current)	5,319,461	1,985,733
Cash and cash equivalent (Note 27)	61,350,288	82,715,294
	160,286,225	146,431,620

Due from related parties

The Company has transactions with its parent and other related parties who are related to the Company by virtue of being members of the Total Group. In the directors' view, all amounts are collectible. Related party receivable balances were assessed for ECL impairment, in accordance with IFRS 9. This assessment is performed together with the trade receivables balances from other customers as at year end.

Due from regulators

This comprises amount due from PPPRA with respect to subsidies/PSF receivables on imported products as well as amounts receivable from PEF with respect to bridging claims. There is no loss experience with government receivables as the determination of amounts due are based on existing regulations/ guidelines and impairment is only recognised when changes occur in the regulations/ guidelines that prohibit or limit recovery of previously recognised amounts. Therefore, the Company has recorded no loss experience with government receivable as this is always deemed receivable and the settlement pattern of the government is not defined or definite.

Other receivables

Other receivables include finance lease receivables, staff debtors and other sundry receivables. The Company reviews the balances due from this category on a yearly basis taking into consideration factors such as continued business/employment relationship. Where such does not exist, the amounts are impaired. Other receivables were assessed for impairment in accordance with IFRS 9.

The finance lease receivables represent amounts due from transporters and these receivables are offset against payments due to them for transport services provided. They are not considered to be impaired as they are receivable based on timelines stipulated in the contracts.

Expected credit loss assessment for customers

The Company has adopted the use of the simplified approach in computing impairment of trade receivables using the allowance matrix to measure the Expected Credit Loss (ECL) of trade receivables from individual customers and related parties.

In arriving at the impairment amounts, the trade receivables are segmented based on the aging characteristics of the receivables and the applicable loss rates are applied to the respective trade receivables category.

After an assessment of the economic realities in Nigeria, loss rates for the period were based on actual credit loss experience on a customer by customer basis over the past three years using the lifetime expected credit loss approach.

Therefore, the historical loss rates have been applied to the trade-receivables balances in the calculation of the impairment loss. The Company also considered internal and external forward-looking information such as macro-economic indices as the Gross Domestic Product growth rate and specific customer repayment outlooks based on discussions with and commitments from its customers as well as knowledge of the industry.

Based on the above, loss rates on receivables that were calculated using a single default rate approach. The single default or loss rate approach is the amount that is expected to be written-off in each bucket (balances that are over 360 days past due in line with the Company's provisioning matrix) and divided by the relevant total unpaid balances included in each ageing bucket.

The following table provides information about the exposure to credit risk and ECLs for trade receivables from customers and amounts due from related parties as at 30 September 2023.

30 September 2023	Weighted average loss ratio	Gross carrying amount	Loss allowance	Credit impaired
		₦'000	₦'000	
Current (not past due)	0.59%	67,701,564	399,127	No
1 - 30 days past due	5.40%	905,158	48,850	No
31 - 60 days past due	25.74%	56,235	14,477	No
61 - 180 days past due	29.13%	101,550	29,580	No
180 - 360 days past due	36.40%	145,677	53,028	No
More than 360 days past due	100.00%	176,667	176,667	Yes
		69,086,850	721,729	

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

31 December 2022	Weighted average loss ratio	Gross carrying amount	Loss allowance	Credit impaired
		₦'000	₦'000	
Current (not past due)	0.38%	38,954,633	149,178	No
1 - 30 days past due	6.90%	1,987,582	137,211	No
31 - 60 days past due	15.64%	464,950	72,725	No
61 - 180 days past due	20.72%	165,680	34,335	No
180 - 360 days past due	15.81%	210,403	33,259	No
More than 360 days past due	100.00%	374,932	374,932	Yes
		42,158,180	801,640	

Expected credit loss assessment for employee receivables

30 September 2023	Weighted average loss ratio	Gross carrying amount	Loss allowance	Credit impaired
		₦'000	₦'000	
Current (not past due)	0.00%	5,505,813	-	No
		5,505,813	-	

31 December 2022	Weighted average loss ratio	Gross carrying amount	Loss allowance	Credit impaired
		₦'000	₦'000	
Current (not past due)	0.00%	4,629,441	-	No
		4,629,441	-	

Loss rates are based on actual credit loss experience over the past six years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the year over which the historical data has been collected, current conditions and the Company's view of economic conditions over the expected lives of the receivables.

In current year, no impairment has been recognised on employee loan receivables as amounts due are backed by collateral which include international shares, in-house pension schemes etc. that ensure the Company will be able to recover the debts from its employees.

Movements in the allowance for impairment in respect of trade receivables.

The movement in the allowance for impairment in respect of trade and other receivables during the period was as follows;

	Individual impairments	
	30 September 2023	31 December 2022
	₦'000	₦'000
Balance at 1 January	1,553,845	1,594,034
Reversal of impairment	(422,415)	(876,080)
Net remeasurement of loss allowance	347,192	835,891
Balance at 30 September	1,478,622	1,553,845
Amount recognised in profit or loss:		
Reversal of impairment	(422,415)	(876,080)
Net remeasurement of loss allowance	347,192	835,891
Impairment (loss)/ reversal on trade receivables	(75,223)	(40,189)

TOTALENERGIES MARKETING NIGERIA PLC

NOTES TO THE FINANCIAL STATEMENTS

Financial Risk Management (cont'd)

31 Classification of financial instruments

(a) Accounting classifications and fair values

The Directors consider that the fair value of financial assets and liabilities are not significantly different from their carrying values.

The classification of financial assets and liabilities, together with the carrying amounts shown in the statement of financial position, are shown in the table below. It does not include fair value information for financial assets and financial liabilities not measured at fair value as the carrying amount is a reasonable approximation of fair value.

30 September 2023

	Financial assets at amortized cost	
	Carrying amount	Fair value
	₦'000	₦'000
Financial assets not measured at fair value		
Trade and other receivables (note 19) ¹	112,675,472	112,675,472
Cash and cash equivalents (note 27)	118,982,171	118,982,171
