STATEMENT OF DIRECTORS' RESPONSIBILITIES

In accordance with the provisions of the Companies and Allied Matters Act, 2020, the Insurance Act CAP I17, LFN, 2004 and National Insurance Commission's prudential guidelines 2015, the Directors are responsible for the preparation of financial statements which give a true and fair view of the state of affairs of the Company and the profit or loss and other comprehensive income for the financial year.

The Directors responsibilities include ensuring that the Company:

i. implement appropriate internal controls to secure the assets of the Company, prevent and detect fraud and other financial irregularities

ii. keeps accounting records which disclose with reasonable accuracy the financial position of the Company and which ensure that the financial statements comply with the requirements of the Companies and Allied Matters Act 2020, Insurance Act CAP I17, LFN 2004, and NAICOM Prudential Guidelines and Circulars.

iii. has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgments and estimates, and that all applicable accounting standards have been followed.

The Directors accept responsibility for maintaining adequate accounting records as required by:

a. International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board
b. Companies and Allied Matters Act, 2020;
c. Insurance Act, CAP I17, LFN 2004;
d. NAICOM Prudential Guidelines and circulars.

The Directors are of the opinion that the financial statements give a true and fair view of the state of affairs of the Company and of the profit or loss for the year. The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal control.

Nothing has come to the attention of the Directors to indicate that the Company will not remain a going concern for at least 12 (twelve) months from the date of approval of the financial statements.

CORPORATE GOVERNANCE REPORT

Reporting entity

Standard Alliance Insurance Plc is a Company incorporated and domiciled in Nigeria. The address of the Company’s registered office is Plot 1, Block 94, Providence Street, Lekki Scheme 1, Lekki – Epe Express way, Lekki, Lagos. The Company underwrites life and non-life insurance risks. The Company is listed on the Nigerian Stock Exchange.

The Company primarily operates in the insurance sector.

Standard Alliance Insurance Plc has over the years built an enviable reputation and has consistently adopted, implemented and applied international best practices in corporate governance, service delivery and value creation for all its stakeholders.

The Company's corporate governance principles are embodied in its Code of Corporate Governance, which represents the core values upon which the Company was founded. The code of Corporate Governance is designed to ensure that the Company's business is conducted in a fair, honest and transparent manner that conforms to high ethical standards. For the entity, good corporate governance goes beyond just adhering to rules and policies of the Regulators; it is about consistently creating excellent value for our stakeholders using the best possible principles within a sustainable and enduring system.

In order to remain a pace setter in the area of good corporate governance practice, the Company's corporate governance practices are constantly under review in line with the dynamics of the business environment and guidelines of the regulatory bodies.

Governance Structure

The Company is committed to high standards of corporate governance. Corporate governance practice in the Company is drawn from various applicable codes of corporate governance issued by National Insurance Commission (NAICOM) and Securities and Exchange Commission (SEC). This ensures compliance with regulatory requirement as well as the core value which the Company upholds.

The provision of the codes is geared towards ensuring transparency and accountability of the Board and Management to shareholders of the Company.

The Board of Directors

The newly reconstituted Board of Directors is made up of seven (7) members; the Chairman, three (3) Non-Exectuve Directors and three (3) Executive Directors.

All the Directors bring various and varied competencies to bear on all Board deliberations. The Directors individually have attained the highest pinnacle of their chosen professions. The Board meets quarterly and is responsible for effective control and monitoring of the Company’s strategy.

The ultimate responsibility for the governance of the Company resides with the Board of Directors, which is accountable to the shareholders for creating and delivering sustainable value through the management of the Company's business. The Board is also responsible for the management of the Company's relationship with its various stakeholders. The day to day running of the Company is delegated to the Chief Executive Officer by the Board of Directors assisted by the Management Committees.

Responsibilities of the Board

The responsibilities of the Board of Directors include:

i. Review corporate strategy, major plans of actions, risk policies, business plans, setting performance objectives, monitoring implementation and corporate performance and overseeing major capital expenditures and acquisitions

CORPORATE GOVERNANCE REPORT (Continued)

ii. Select, compensate, monitor and when necessary, replace key executives and oversee succession planning.

iii. Monitor the effectiveness of the governance practices under which it operates and make changes as may be necessary.

iv. Ensure the integrity of the Company's accounting and financial reporting systems, including the independent audit and that appropriate systems of control are in place, in particular, systems for monitoring risk, financial control and compliance with the law.

v. Monitor and manage potential conflicts of interest of management, board members and shareholders, including misuse of corporate assets and abuse in related party transactions.

vi. Supervise and monitor the execution of policies and providing direction for the management.

vii. Monitor potential risks within the company including recognising and encouraging honest whistle blowing.

viii. Oversee the process of disclosure and communication in the company.

Roles of Chairman and Chief Executive Officer

The roles of Chairman and Chief Executive are separate and no one individual combines the two positions. The Chairman's main responsibility is to lead and manage the Board to ensure that it operates effectively and fully discharges its legal and regulatory responsibilities. The Chairman is responsible for ensuring that Directors receive accurate, timely and clear information to enable the Board take informed decisions, monitor effectively and provide advice to promote the success of the Company. The Chairman also facilitates the contributions of Directors and promotes effective relationships and open communications between Executive and non-Executive Directors, both inside and outside the Boardroom.

The Board has delegated the responsibility for the day-to-day management of the Company to the Chief Executive Officer, who is supported by Executive Management. The Chief Executive Officer executes the powers delegated to him in accordance with guidelines approved by the Board of Directors. Executive management is accountable to the Board for the development and implementation of strategies and policies. The Board regularly reviews Company performance, matters of strategic concern and any other matters it regards as material.

Board Committees

The Board carries out some of its responsibilities through the Board sub-committees whose terms of reference set out clearly their roles, responsibilities, scope of authority and procedures for reporting to the Board. Each committee is chaired by a non-Executive Director in compliance with principles of good corporate governance and the Audit Committee is chaired by a non- executive director. These committees report to the Board of Directors on their activities and decisions, which are ratified by the full Board. The Committees are as follows:

1) **The Finance, Strategy and General purposes Committee**

This is a standing Committee of the Board with the responsibility to review the Company investment portifolio. The terms of reference of the Committee includes:

• Review of existing investments;
• Review of investment strategies;
• Review of company's investments by way of equities;
• Review of Budgets.
• Review and make recommendations on procedural manuals/policies;
• Make recommendation on recruitment/termination of General Managers and above to the Board;
• Strategy formulation;
• Review of Human Capital Management Operations
• Review of Marketing activities

The Committee had the following members during the year under review:

The Committee did not hold any meeting during the year under review because the Board of Directors were not sufficient in number.

2) **The Enterprise Risk Management and Governance Committee**

The terms of reference of this Committee includes the following:

- Establish criteria for Board and Board Committee memberships, review candidate's qualifications and any potential conflict of interest, assess the contribution of current directors in connection with their re-appointment and make recommendations to the Board;
- Prepare job specification for the Chairman's position, including assessment of time commitment required of the candidate;
- Periodic evaluation of skills, knowledge and experience required on the Board;
- Make recommendations on experience required by the Board Committee members, Committee appointments and removal, operating structure, reporting and other Committee operational matters;
- Make recommendations on compensation structure for Executive Directors;
- Provide input to the annual report of the Company in respect of Director's compensation;
- Ensure Succession Policy and Plan, subsists for positions of Chairman, CEO/MD, Executive Directors and subsidiary MDs;
- Ensure Board conducts Board Evaluation on annual basis;
- Review performance and effectiveness of the subsidiary's Board on annual basis;
- Review and make recommendations to Board for approval of the Company's organizational structure and any proposed amendments;
- Review of performance bonuses;
- Review of Staff Remuneration package.
- Review and approval of the Company's Enterprise Risk Management policy including risk appetite and risk strategy;
- Review the adequacy and effectiveness of risk management and controls;
- Oversight of management's process for the identification of significant risks across the Company and the adequacy of prevention, detection and reporting mechanisms;
- Review of the Company's compliance level with applicable laws and regulatory requirements which may impact the Company's risk profile;
- Periodic review of changes in the economic and business environment, including emerging trends and other factors relevant to the Company's risk profile;
- Review and recommend for approval of the Board risk management procedures and controls for new products and services.

The Committee did not hold any meeting during the year under review because the Board of Directors were not sufficient in number.

CORPORATE GOVERNANCE REPORT (Continued)

3) **The Audit and Compliance Committee**

The Audit and Compliance Committee is made up of 6 (six) members, three representatives each of Shareholders and Directors. Its members are elected at the Annual General Meeting.

In addition to its responsibility to review the scope, independence and objectivity of the audit, the Committee carries out all such matters as are referred to it by the Companies and Allied Matters Act, 2020. These functions include to:

- Meet at least thrice yearly and once with the External Auditors;
- Review Whistle blowing policy;
- Periodic Evaluation of the Committee's performance;
- Carrying out internal control checks on all company activities;
- Make recommendations to the Board on sanctions in areas of default where necessary;
- Receive and review integrity of data of the audited financial statements of the company;
- Make recommendation on appointment and remuneration of external auditors;
- Review and make recommendations based on Management letters issued by external auditors;
- Monitor the quality of internal control procedures and compliance with regulatory policies.

The Committee had the following members during the year under review:

Nathaniel Ibitowa	-	Chairman
Musa Lawan	-	Member
Rohan Fernando	-	Member
Erinfolami Gafar	-	Member
Matthew Esonanjor (SAN)	-	Member
Bar. Halima Jimada		Secretary

This Committee was recently reconstituted after new core investors came on board. The previous Audit Committee of the former management did not hold any meeting in the year under review.

Internal Control

It is the responsibility of the Board of Directors to ensure that all the records are accurate and correctly reflect the financial position of the Company. The Board is mindful of the fact that as an insurance company, great relevance is placed by policy holders and potential investors on the accuracy of information contained in its financial statements.

In order to ensure the accuracy of its records, the Board sets standards that the Quality Assurance department implements system of internal control comprising policies, standards and procedures to ensure that the safety of assets and reduction of the risk of loss, error, fraud and other irregularities. Both the Quality Assurance (Internal Auditors) and the External Auditors independently appraise the adequacy of the internal controls.

Muhtari Dangana & Co (Chartered Acountants) acted as external auditors to the Company for the 2023 financial year. Their report for the year under review is contained on pages 20 - 23 of these financial statements.

SUMMARY OF MATERIAL ACCOUNTING POLICIES

The following are the material accounting policies adopted by the Company in the preparation of its financial statements. These policies have been consistently applied to all year's presentations.

1 **The reporting entity**

The Company was incorporated in July 1981 as a Private Limited Liability Company and commenced full operations in 1982 under the name Jubilee Insurance Company Limited. The name was changed to Standard Alliance Insurance Company Limited (Standard Alliance) in August 1996.
The Company successfully merged with its subsidiary Company, Standard Alliance Life Assurance Limited on 27 February 2017.

Standard Alliance Insurance became a Public Liability Company (Plc) on 30th May 2002 and was quoted on the Nigerian Stock Exchange in December 2003.

The Company is 100% fully owned by Nigerian citizens and Institutional investors. Its major shareholders are:

	Units	%
Gemrock Management Company Limited	2,594,060,738	20.09
Standard Alliance Investments Limited	2,557,636,144	19.81
First City Monument Bank Plc	1,120,000,000	8.67
Bode Akinboye	435,442,485	3.37
Sina Alimi (also a director in Gemrock Mgt. Co. Ltd.)	382,013,914	2.96

Subsequently, on August 19, 2024, the shares that previously belonged to Standard Alliance Investments Limited were sold to a new core investor, Endura Investment Global Limited. The financial statements for the year ended 31st December 2023, which had been in arrears for one (1) year, were finally approved by the new Board of Directors on 19th September, 2025.

The Company's principal activity continues to be provision of risk underwriting and related financial services to its customers. Such services include provision of general insurance services and life assurance to both corporate and individual customers.

2. **Basis of preparation**

2.1 **Statement of compliance with International Financial Reporting Standards (IFRSs)**

The financial statements are prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and the interpretations of these standards, issued by the International Financial Reporting Standards Interpretation Committee (IFRIC) and the requirements of the Companies and Allied Matters Act 2020, Financial Reporting Council (Amendment) Act 2023 and the Insurance Act, CAP I17,LFN 2004 and regulatory guidelines as pronounced from time to time by National Insurance Commission (NAICOM).

The financial statements include the statements of financial position, statements of profit or loss and other comprehensive income, the statements of cash flows, the statement of changes in equity, summary of significant accounting policies and other explanatory information.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (Continued)

2.2 Going concern

The Company's financial statements are prepared on a going concern basis. Even though the parties are aware of material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern, the Directors are satisfied that the Company has the resources to continue in business for the foresesable future.

This conclusion of the Directors is on the mitigating procedures taken to inject fresh capital through a recapitalization and business restructuring plan involving major prospective investors.

2.3 Basis of measurement

Historical cost basis was used in the preparation of the financial statements as modified by certain items of:

- Investments at fair value
- Financial assets at fair value through other comprehensive income (FVOCI) that are measured at fair value
- Investments carried at amortised cost
- Impaired assets at their recoverable amounts
- Insurance contract liabilities at fair value
- Freehold Land and Buildings stated at revalued amount

2.4 Functional and Presentation Currency

The financial statements are presented in Nigerian Naira (N), which is also the functional currency of the Company and rounded to the nearest thousand (N'000) unless otherwise indicated.

2.5 Transactions and balances in foreign currencies

Transactions denominated in foreign currencies are recorded in Naira at the rate of exchange ruling at the date of each transaction. Any gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included in the profit and loss account. Monetary assets and liabilities denominated in foreign currencies at the statement of financial position date are translated at that date. Exchange gains arising from the revaluation of monetary assets and liabilities are recognized in the income statement while those on non-monetary items are recognized in other comprehensive income. For non-monetary financial investments, unrealized exchange differences are recorded directly in equity until the asset is disposed or impaired.

2.6 Order of presentation

The Company presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in the notes.

2.7 Regulatory authority and financial reporting

The Group is regulated by the National Insurance Commission of Nigeria (NAICOM) under the National Insurance Act of Nigeria. The Act specifies certain provisions which have impact on financial reporting as follows:

i Section 20 (1a) provides that provisions for unexpired risks shall be calculated on a time apportionment basis of the risks accepted

ii Section 20 (1b) requires provision for outstanding claims to be credited with an amount equal to the total estimated amount of all outstanding claims with a further amount representing 10 percent of the estimated figure for outstanding claims in respect of claims incurred but not reported at the end of the year under review;

iii Sections 21 (1a) and 22 (1b) require maintenance of contingency reserves for general and life businesses respectively at specified rates as set out under Note 3.27 to cover fluctuations in securities and variation in statistical estimates;

SUMMARY OF MATERIAL ACCOUNTING POLICIES (Continued)

3 **Significant management judgements and key sources of estimation uncertainty**

In the process of applying the accounting policies adopted by the Company, the directors make certain judgments and estimates that may affect the carrying values of assets and liabilities in the next financial period. Such judgments and estimates are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the current circumstances. The directors evaluate these at each financial reporting date to ensure that they are still reasonable under the prevailing circumstances based on the information available.

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require material adjustments to the carrying amount of the asset or liability affected in the future. These factors could include:

(i) **Significant judgements made in applying the Company's accounting policies**

The judgements made by the directors in the process of applying the Company's accounting policies that have the most significant effect on the amounts recognised in the financial statements include:

- Whether it is probable that future taxable profits will be available against which temporary differences can be utilised; and
- Whether the Company has the ability to hold financial assets at amortised cost until they mature. If the Company were to sell other than an insignificant amount of such financial asset before maturity, it would be required to classify the entire class as financial assets through other comprehensive income (FVOCI) and measure them at fair value.

(ii) **Key sources of estimation uncertainty**

a) **Valuation of insurance contract liabilities**

- Critical assumptions are made by the actuaries in determining the present value of actuarial liabilities. These assumptions are set out in accounting policy 5.19 and as embedded in the report. The liability for insurance contracts is either based on current assumptions or on assumptions established at inception of the contract, reflecting the best estimate at the time increased with a margin for risk and adverse deviation. All contracts are subject to a liability adequacy test, which reflects management's best current estimate of future cash flows.
- Estimates are also made as to future investment income arising from the assets backing insurance contracts. These estimates are based on current market returns as well as expectations about future economic and financial developments.
- Assumptions on future expenses are based on current expense levels, adjusted for expected expense inflation if appropriate.

b) **Property, plant and equipment**

Critical estimates are made by the directors in determining the useful lives and residual values of property, plant and equipment.

c) **Impairment losses**

Estimates are made in determining the impairment losses on assets. Such estimates include the determination of the recoverable amount of the asset.

d) **Income taxes**

The Company is subject to income taxes under the Nigerian Tax Laws. Significant estimates are required in determining the provisions for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcomes of these matters are different from the amounts that were initially recorded, such differences will impact the income tax and the deferred tax provisions in the period in which such determinations are made.

e) **Critical judgments in applying the entity's accounting policies**

In the process of applying the Company's accounting policies, management has made judgements in determining:

i) The classification of financial assets and liabilities
ii) Whether assets are impaired.
iii) Whether land and buildings meet the criteria to be classified as investment property.

NOTES TO THE FINANCIAL STATEMENTS (continued)

f **Changes in Material Accounting Policy – IFRS 17**

The Company applied IFRS 17 standards (Insurance Contracts) from 1 January 2023. This standard has brought significant changes to the accounting for insurance and reinsurance contracts. As a result, we restated certain comparative amounts and presented the statement of financial position as at 1 January 2022. We consistently applied the accounting policies as set out in all periods presented in these financial statements. The nature and effects of key changes in the Company's accounting policies resulting from its adoption of IFRS 17 is summarized below:

- Recognition, measurement and presentation of insurance contracts: IFRS 17 establishes principles for the recognition, measurement, presentation and disclosure of insurance contracts, reinsurance contracts and investment contracts with discretionary participation features. It introduces a model that measures groups of contracts based on the estimates of the present value of future cash flows that are expected to arise as the Company fulfils the contracts, an explicit risk adjustment for non-financial risk and contractual service margin. Under IFRS 17, insurance revenue in each reporting period represents the changes in the liabilities for remaining coverage that relate to services for which the Company expects to receive consideration and an allocation of premiums that relate to recovering insurance acquisition cash flows. In addition, investment components are no longer included in insurance revenue and insurance service expenses. Insurance finance income and expenses are presented in the profit or loss separately from insurance revenue and insurance service expenses. The Company applies the premium allocation approach (PAA) to simplify the measurement of contracts in the non-life segment. When measuring liabilities for remaining coverage, the PAA is similar to the Company's previous accounting treatment. However, when measuring liabilities for incurred claims, the Company now discounts the future cash flows (unless they are expected to occur in one year or less from the date on which the claims are incurred) and includes an explicit risk adjustment for non-financial risk. Previously, all acquisition costs were recognised and presented as separate assets from the related insurance contracts ('deferred acquisition costs') until those costs were included in profit or loss and OCI. Under IFRS 17, only insurance acquisition cash flows that arise before the recognition of the related insurance contracts are recognised as separate assets and are tested for recoverability. These assets are presented in the carrying amount of the related portfolio of contracts and are derecognised once the related contracts have been recognized.

The Company applies the general measurement model (GMM) approach to its life segment. The GMM approach measures group of insurance contracts as the sum of the following components, or 'building blocks', for each group of insurance contracts:

i. **Fulfilment cash flows, which comprise:** - Estimates of expected future cash flows over the life of the contract - An adjustment to reflect the time value of money and the financial risks related to the future cash flows to the extent that the financial risks are not included in the estimates of the future cash flows - A risk adjustment for non-financial risk.

ii. **Contractual service margin**: This represents unearned profit an entity will recognise as it provides service under the insurance contracts in the income and expenses from reinsurance contracts other than insurance finance income and expenses are now presented as a single net amount in profit or loss. Previously, amounts recovered from reinsurers and reinsurance expenses were presented separately.

Transition

On transition date, 1 January 2023, the Company:

i. Has identified, recognised and measured each group of insurance contracts as if, IFRS 17 had always applied.

ii. Derecognised any existing balances that would not exist had IFRS 17 always applied.

iii. Recognised any resulting net difference in equity. On transition to IFRS 17, the Company has applied the full retrospective approach unless where it is impracticable. The Company has applied the full retrospective approach on transition to all contracts issued on or after 1 January 2022.

iv. Recognised any resulting net difference in equity.

NOTES TO THE FINANCIAL STATEMENTS (continued)

On transition to IFRS 17, the Company has applied the full retrospective approach on the transition to all contracts issued on or after 1 January 2022. The Company has used the following procedure to determine the CSM at initial recognition for these contracts:

i. Estimated future cash flows at the date of initial recognition as the amount of the future cash flows at transition date, adjusted by the cash flows that have occurred between the date of initial recognition and the transition date. The cash flows that are known to have occurred include cash flows resulting from contracts that ceased to exist before the transition date.

Discount rates:

i. The Nigerian Actuarial Society published rates were used. Locked in rates for 2021 were used for 2021 data and 2022 rates were used for the 2022 data.
ii. Estimated the risk adjustment for non-financial risk at the date of initial recognition by adjusting the risk adjustment at transition date by the expected release of risk in the periods before transition. The expected release of the risk was determined with reference to the release of risk for similar contracts that the Company has issued subsequent to the transition date

The Company has elected to disaggregate insurance finance income or expense between amounts included in profit or loss and amounts included in other comprehensive income and reset the cumulative amount of insurance finance income or expense recognised in other comprehensive income at the transition date to zero.

Fair value approach

The Company has applied the fair value approach on transition for certain groups of term-life contracts as, prior to transition, it grouped contracts from multiple cohorts and years into a single unit for accounting purposes. Obtaining reasonable and supportable information to apply the full retrospective approach was impracticable without undue cost or effort. The Company has determined the CSM of the liability for remaining coverage at the transition date, as the difference between the fair value of the group of insurance contracts and the fulfilment cash flows measured at that date. In determining fair value, the Company has applied the requirements of IFRS 13 Fair Value Measurement, except for the demand deposit floor requirement.

The Company has aggregated contracts issued more than one year apart in determining groups of insurance contracts under the fair value approach at transition as it did not have reasonable and supportable information to aggregate groups into those including only contracts issued within one year. For the application of the fair value approach, the Company has used reasonable and supportable information available at the transition date in order to:

i. Identify groups of insurance contracts.
ii. Determine whether any contracts are direct participating insurance contracts.
iii. Identify any discretionary cash flows for insurance contracts without direct participation features

The discount rate for the company of contracts applying the fair value approach was determined at the transition date. Therefore, for the measurement of fulfilment cash flows at the date of transition, the locked-in discount rate is the weighted average of the rates applicable at the date of initial recognition of contracts that joined a group over a 12-month period. The discount rate used for accretion of interest on the CSM is determined using the bottom-up approach at inception.

The following table and accompanying notes below explain the original measurement categories under IFRS 4 and IAS 39 and the new measurement under IFRS 17 and IFRS 9 as at 1 January 2022 and 1 January 2023 respectively.

The table above shows that the IFRS 17 insurance contract liabilities is higher than the IFRS 4 liabilities.

The key differences are:
- N(149)m as a result of change in discount rate from fixed discount rate used under IFRS 4 to the use of yield curve
- N70m of contractual service margin (CSM) under IFRS 17 and
- N124m of risk adjustment under IFRS 17.

The table below shows the differences by portfolio.

1 January 2022 Insurance and Investment Contract Liabilities

The table above shows that the IFRS 17 insurance contract liabilities is higher than the IFRS 4 liabilities.

d The table below shows the impact on equity as a result of the transition from IFRS 4 to IFRS 17 as at 31 MARCH2021.

IFRS 4 to IFRS 17 31 1 January 2022 Transition Impact on Equity - Non Life			
IFRS 4 to IFRS 17 Transition Impact on Equity	**IFRS 17**	**IFRS 4**	**Difference**
	N'000	**N'000**	**N'000**
Derecognition of DAC	-	-	-
Reduction in Reinsurance contract assets	-	368,242	368,242
Increase in Insurance contract liabilities	5,318,297	5,167,797	150,499
Changes in Investment contract laibilities	2,448,716	2,453,974	(5,259)
Impact on Retained earnings and Equity	**7,767,012**	**7,990,014**	**513,483**

- Under IFRS 4, the we cede insurance risk in the normal course of business on the bases of our treaty and facultative agreements. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with settled claims associated with the reinsurer’s policies and are in accordance with the related reinsurance contract. Under IFRS 17, Reinsurance contracts held are treated as independent contracts, grouped and measured according to the IFRS 17 requirements; e.g. with General Measurement Method or Premium Allocation Approach. Recoveries on Claims paid is the only Reinsurance component that remains unchanged from IFRS 4 to IFRS 17.

- Under IFRS 4, Deferred Acquisition Cost is treated as those direct and indirect costs incurred during the financial year arising from the writing or renewing of insurance contracts and are deferred to the extent that these costs are recoverable out of future premiums. All other acquisition costs are recognized as an expense when incurred. Under IFRS 17, Deferred Acquisition Cost is included as a part of the Insurance Contract Liabilities and not as a standalone item, as it was under IFRS 4.

- Under IFRS 17, the Discounted Cashflow model is also used to determine adequate reserves for in-force long-term Life business contracts as at the valuation date. The results thereof are then used to ascertain adjustments necessary to reserve component balances including the Best Estimate of Liabilities, the Risk Adjustment factor and the Contractual Service Margin. This difference in treatment of the components of reserve, as well as difference in IFRS 17 prescribed methodology are responsible for the variations on IFRS 4 and IFRS 17 reserves for the Life business.

NOTES TO THE FINANCIAL STATEMENTS (continued)

IFRS 17 TRANSITION NOTES - cont'd

- Under IFRS 4, an assessment is made of whether the recognized life insurance liabilities are adequate by carrying out a liability adequacy test. The liability value is adjusted to the extent that it is insufficient to meet expected future benefits and expenses. In performing the adequacy test, current best estimates of future contractual cash flows, including related cash flows such as claims handling and policy administration expenses, policyholder options and guarantees, as well as investment income from assets backing such liabilities, are used. Discounted cash flows model is used in the valuation. Non-life insurance contract liabilities include the outstanding claims provision, the provision for unearned premium and the provision for premium deficiency. The outstanding claims provision is based on the estimated ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not, together with related claims expenses Short-term contracts (Group Life and Non-Life) liabilities are similar in components under IFRS 17 and IFRS 4. Differences observed are due to grouping requirements which may increase the provision for premium deficiency (for onerous groups), the introduction by IFRS 17 of a Risk Adjustment factor and of Discounting for Outstanding and Incurred Claims projections.

- Investment contract liabilities are recognized when contracts are entered into and premiums are received. These liabilities are initially recognized at fair value, this being the transaction price excluding any transaction costs directly attributable to the issue of the contract. Subsequent to initial recognition investment contract liabilities are measured at amortized cost. Under IFRS 4, the Company had other investment contract liabilities which were attached to insurance contracts within the ordinary life portfolio. Under IFRS 17, the investment contract liabilities attached to the long-term contracts are treated as not being qualified to be separable from their associated insurance components, due to the inability to measure one without the other, as stated in the IFRS 17 standard, and they are thus measured and valued as part of the insurance contract liabilities.
- Under IFRS17, the concepts of Deferred Commission Income (DCI) are no longer applied to produce separately recognized assets and liabilities in relation to insurance contracts, instead, they are implicitly included in the measurement of insurance contract assets and liabilities.

- The Company elected to reclassify and measure its Trade payables consisting of payables to reinsurance companies and premium deposits to Other insurance contract liabilities. They represent financial obligations arising from the Company's insurance business that are basically outside the scope of the definition of insurance contracts.

- As at 1 January 2022, IFRS 4 retained loss closed at -N18.9 bn for the Company. The difference between this position and IFRS 17 is a net reduction of NGN 1.3bn. As at 1 January 2023, IFRS 4 retained loss closed at -N19.8 bn. The difference between this position and IFRS 17 is a net reduction of -NGN400,000. This is due to the changes that have occurred from the transition to Insurance Revenue, Insurance Service Result, and the inclusion of Net Insurance/Reinsurance and Net Finance Income/(Expenses) in the IFRS 17 restated financial performance.

NOTES TO THE FINANCIAL STATEMENTS (continued)

NOTES TO THE FINANCIAL STATEMENTS (continued)

Gross premium written, Unearned premium movement, Gross Premium income, Insurance Revenue

Under IFRS 4, the gross premium is adjusted by change in insurance contract liabilities (UPR) to arrive at the Gross Premium Income. Under IFRS 17, the Insurance revenue is made up of the following items:

- Expected benefits incurred – Under PAA model (Group Life), this is based on premium allocated in the reporting period due to the passage of time and it is based on the coverage period of each contract using the start and end date for each contract. For contracts using General Model Approach (GM), this is based on the expected insurance claims in the reporting period which are projected using actuarial assumptions.

- Expected expenses incurred - This is the expected expenses projected in the actuarial model using the valuation assumptions. This applies to business using General Model.

- Loss Component: systematic allocation – For group of insurance contracts that are loss making, the loss will need to be recognised immediately in P&L and this is shown in the insurance service expenses as "Loss Component: losses and reversal of losses". However, this loss will need to be tracked from one valuation to another, and the loss will need to be systematically allocated across the reporting periods in the coverage period and disclosed in both insurance revenue and insurance service expenses. So, this is in and out in the insurance service result.

- Change in the risk adjustment - The change in risk adjustment is the difference between the current risk adjustment and the prior year-end risk adjustment.

- CSM recognised – The Contractual Service Margin (CSM) is the unearned profit in the business for contracts using GMM. The CSM recognised in the period is part of the profit released in the reporting period and it is calculated using the coverage units of the group of insurance contracts.

- Recovery of acquisition cash flows – For businesses using GMM, the acquisition expenses are allowed at initial recognition. However, the acquisition expenses amortised in the period using the coverage unit is disclosed in P&L and it does not impact insurance service result. The corresponding impact is reported in insurance service expense. For the PAA model, Under IFRS 17, the Insurance revenue is the gross premium allocated to the reporting period. The allocation of the premium is based on the coverage period of each contract using the start and end date for each contract. The Company has reclassified the Gross premium income and remeasured this balance and reported as Insurance Revenue.

Reinsurance Expense and Net Expenses from Reinsurance contracts held

Reinsurance expenses is now reclassified and presented as Net expenses from reinsurance contract.

Insurance service expenses: Under IFRS 17, the insurance service expenses are made up of the following items:

- Incurred claims – This is actual claims reported in the period. Note that this is different from the actual claims paid in the period. The difference between the actual claims paid in the period and the actual claims reported in the period will feed into "changes in BEL related to LIC".
- Incurred Fulfilment expenses – The fulfilment expenses are the actual incurred expenses relating to the core running of the business.
- Amortisation of insurance acquisition cash flows – For businesses using GMM, this is the opposite of the "recovery of acquisitions cash flows" in insurance revenue. For businesses using PAA model, this is the amortised acquisition expenses recognised in the reporting period.
- Changes in BEL related to LIC – This represents the movement between movement in IBNR and outstanding claims in the reporting period after allowing for claims reported and claims paid in the period.
- Changes in RA related to LIC – This is the change in risk adjustment relating to LIC in the reporting period where applicable.

NOTES TO THE FINANCIAL STATEMENTS (continued)

- Loss Component: systematic allocation – This line discloses the amortised losses for the reporting period. There is a corresponding line in the insurance revenue, so no impact on P&L statement.
- Loss Component: losses and reversal of losses – This contains the impact of losses from group of insurance contracts (GICs) that are either onerous at inception or becomes onerous during the reporting period.

Net Finance income and expense from Insurance and Reinsurance contracts held

The Company has remeasured and accounted for under IFRS 17. The Insurance finance expenses relate to changes in economic movements. These items do not adjust the CSM but are classified under Insurance finance expenses. These items relate to unwinding of the cashflows, change in economic assumptions, CSM interest accretion and change in fair value of underlying items (interest credited to policyholders for investment linked contracts). The reinsurance finance income is akin to the insurance finance expenses and it contains the changes in economic movements in reinsurance BEL and reinsurance CSM interest accretion.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (Continued)

4. **Material accounting policies**
The principal accounting policies adopted in the preparation of these financial statements are set out below:

4.1 **Cash and cash equivalents**

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less. They include bank overdraft in the context of the statement of cash flows.

4.2 **Financial instruments**

Recognition

The Company on the date of origination or purchase recognizes placements, equity securities and deposits at the fair value of consideration paid. Regular-way purchases and sales of financial assets are recognized on the settlement date. All other financial assets and liabilities, including derivatives, are initially recognized on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

Classification and Measurement
Initial measurement of a financial asset or liability is at fair value plus transaction costs that are directly attributable to its purchase or issuance. For instruments measured at fair value through profit or loss, transaction costs are recognized immediately in profit or loss. Financial assets include placement with banks, treasury bills and equity instruments.

Financial assets are classified into one of the following measurement categories:
1. Amortised cost
2. Fair Value through Other Comprehensive Income (FVOCI)
3. Fair Value through Profit or Loss (FVTPL) for trading related assets

The Company classifies all of its financial assets based on the business model for managing the assets and the asset's contractual cash flow characteristics.

Business Model Assessment
Business model assessment involves determining whether financial assets are managed in order to generate cash flows from collection of contractual cash flows, selling financial assets or both. The Company assesses business model at a portfolio level reflective of how groups of assets are managed together to achieve a particular business objective. For the assessment of business model the Company takes into consideration the following factors:

i The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets

ii How the performance of assets in a portfolio is evaluated and reported to Company heads and other key decision makers within the Company's business lines;

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.2 **Financial instruments - cont'd**
Business Model Assessment - cont'd

iii The risks that affect the performance of assets held within a business model and how those risks are managed;

iv How compensation is determined for the Company's business lines' management that manages the assets;

v The frequency and volume of sales in prior periods and expectations about future sales activity.
Management determines the classification of the financial instruments at initial recognition. The business model assessment falls under three categories:

a) Business Model 1(BM1): Financial assets held with the sole objective to collect contractual cash flows;

b) Business Model 2 (BM2): Financial assets held with the objective of both collecting contractual cash flows and selling; and

c) Business Model 3 (BM3): Financial assets held with neither of the objectives mentioned in BM1 or BM2 above. These are basically financial assets held with the sole objective to trade and to realize fair value changes.

The Company may decide to sell financial instruments held under the BM1 category with the objective to collect contractual cash flows without necessarily changing its business model if one or more of the following conditions are met:

i) Where these sales are infrequent even if significant in value. A Sale of financial assets is considered infrequent if the sale is one-off during the Financial Year and/or occurs at most once during the quarter or at most three (3) times within the Financial Year.

The Company may decide to sell financial instruments held under the BM1 category with the objective to collect contractual cash flows without necessarily changing its business model if one or more of the following conditions are met:

ii) Where these sales are insignificant in value both individually and in aggregate, even if frequent. A sale is considered insignificant if the portion of the financial assets sold is equal to or less than five (5) per cent of the carrying amount (book value) of the total assets within the business model.

iii) When these sales are made close to the maturity of the financial assets and the proceeds from the sales approximate the collection of the remaining contractual cash flows. A sale is considered to be close to maturity if the financial assets have a tenor to maturity of not more than one (1) year and/or the remaining contractual cash flows expected from the financial asset do not exceed the cash flows from the sales by ten (10) per cent.

Other reasons: The following reasons outlined below may constitute 'Other Reasons' that may necessitate selling financial assets from the BM1 category that will not constitute a change in business model:

1. Selling the financial asset to realize cash to deal with unforeseen need for liquidity (infrequent).
2. Selling the financial asset to manage credit concentration risk (infrequent)
3. Selling the financial assets as a result of changes in tax laws (infrequent).
4. Other situations also depend upon the facts and circumstances which need to be judged by the management

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Cash flow characteristics assessment

The contractual cash flow characteristics assessment involves assessing the contractual features of an instrument to determine if they give rise to cash flows that are consistent with a basic investment arrangement. Contractual cash flows are consistent with a basic deposit arrangement if they represent cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

Principal is defined as the fair value of the instrument at initial recognition. Principal may change over the life of the instruments due to repayments. Interest is defined as consideration for the time value of money and the credit risk associated with the principal amount outstanding and for other basic lending risks and costs (liquidity risk and administrative costs), as well as a profit margin.

a) Financial assets measured at amortised cost

Financial assets are measured at amortised cost if they are held within a business model whose objective is to hold for collection of contractual cash flows where those cash flows represent solely payments of principal and interest. After initial measurement, debt instruments in this category are carried at amortized cost using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. Amortized cost is calculated taking into account any discount or premium on acquisition, transaction costs and fees that are an integral part of the effective interest rate. Amortization is included in Interest income in the Consolidated Statement of Income. Impairment on financial assets measured at amortized cost is calculated using the expected credit loss approach.

Financial assets measured at amortized cost are presented net of the allowance for credit losses (ACL) in the statement of financial position

b) Financial assets measured at FVOCI

Financial assets are measured at FVOCI if they are held within a business model whose objective is to hold for collection of contractual cash flows and for selling financial assets, where the assets' cash flows represent payments that are solely payments of principal and interest. Subsequent to initial recognition, unrealized gains and losses on debt instruments measured at FVOCI are recorded in other comprehensive Income (OCI).

c) Financial assets measured at FVTPL

Financial assets measured at FVTPL include assets held for trading purposes, assets held as part of a portfolio managed on a fair value basis and assets whose cash flows do not represent payments that are solely payments of principal and interest. Financial assets may also be designated at FVTPL if by so doing eliminates or significantly reduces an accounting mismatch which would otherwise arise. These instruments are measured at fair value in the Statement of Financial Position, with transaction costs recognized immediately in the Statement of Income.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

d) Equity Instruments

Equity instruments are measured at FVTPL, unless an election is made to designate them at FVOCI upon purchase. For equity instruments measured at FVTPL, changes in fair value are recognized in the Statement of profit or loss. The Company can elect to classify non-trading equity instruments at FVOCI. This election will be used for certain equity investments for strategic or longer term investment purposes. The FVOCI election is made upon initial recognition, on an instrument-by-instrument basis and once made is irrevocable. Gains and losses on these instruments including when derecognized/sold are recorded in OCI and are not subsequently reclassified to the Statement of profit or loss. Dividends received are recorded in Interest income in the Statement of Income. Any transaction costs incurred upon purchase of the security are added to the cost basis of the security and are not reclassified to the Statement of Income on sale of the security.

Financial liabilities are classified into one of the following measurement categories:

(i) Fair Value through Profit or Loss (FVTPL)

(ii) Amortised cost

i) Financial Liabilities at fair value through profit or loss

Financial liabilities accounted for at fair value through profit or loss fall into two categories:

Financial liabilities held for trading and financial liabilities designated at fair value through profit or loss on inception

Financial liabilities at fair value through profit or loss are financial liabilities held for trading. A financial liability is classified as held for trading if it is incurred principally for the purpose of repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking. Derivatives are also categorized as held for trading unless they are designated and effective as hedging instruments. Financial liabilities held for trading also include obligations to deliver financial assets borrowed by a short seller. Gains and losses arising from changes in fair value of financial liabilities are included in the income statement and are reported as 'Net gains/(losses) on financial instruments classified as held for trading. Interest expenses on financial liabilities held for trading are included in 'Net interest income'.

Financial Liabilities are designated at FVTPL when either the designation eliminates or significantly reduce an accounting mismatch which would otherwise arise or the financial liability contains one or more embedded derivatives which significantly modify the cash flows otherwise required. For liabilities designated at fair value through profit or loss, all changes in fair value are recognized in Non-interest income in the Statement of Income, except for changes in fair value arising from changes in the Company's own credit risk which are recognized in OCI. Changes in fair value of liabilities due to changes in the Company's own credit risk, which are recognized in OCI, are not subsequently reclassified to the Statement of Income upon derecognition/extinguishment of the liabilities.

ii) Financial Liabilities at amortised cost

Financial liabilities that are not classified at fair value through profit or loss fall into this category and are measured at amortised cost using the effective interest rate method. Financial liabilities measured at amortised cost are debt securities in issue for which the fair value option is not applied, e.g. convertible bonds and subordinated debts.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.3 Reinsurance assets

The Company cedes insurance risk in the normal course of business on the bases of treaty and facultative agreements. Reinsurance assets represent balances due from reinsurance Companies. Amounts recoverable from reinsurers are estimated in a manner consistent with settled claims associated with the reinsurer's policies and are in accordance with the related reinsurance contract.

4.4 Trade receivables

Trade receivables arising from insurance contracts are stated after adjusting for receivables outstanding from brokers over 30 days.

4.5 Other receivables and prepayments

They are initially recognised at fair value and subsequently measured at amortised cost less provision for impairment. A provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtors) that the Company will not be able to collect all the amount due under the original terms of the contract. Impaired debts are derecognised when they are assessed as uncollectible. If in a subsequent period the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date. Any subsequent reversal of an impairment loss is recognised in profit or loss. Prepayments are carried at cost less accumulated impairment losses.

4.6 Deferred acquisition costs (DACs)

Incremental costs directly attributable to the acquisition of investment and insurance contracts with investment management services are capitalized to a Deferred Acquisition Cost(DAC) asset if they are separately identifiable, can be measured reliably and its probable that they will be recovered. DAC are amortized in the income statement over the term of the contracts as the related services are rendered and revenue recognized, which varies from year to year depending on the outstanding terms of the contracts in force. The DAC asset is tested for impairment bi annually and written down when it is not expected to be fully recovered.

4.7 Non-current assets held for sale

Non-current assets or disposal group comprising assets and liabilities that are expected to be recovered primarily through sale rather than through continuing use are classified as held for sale. Immediately before classification as held for sale, the asset, or components of a disposal group are remeasured in accordance with the Company's accounting policies.

Thereafter generally, the assets or disposal group are measured at the lower of their carrying amounts and fair values less costs to sell. Any impairment loss on a disposal group first is allocated to goodwill, and then to remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property and biological assets, which continue to be measured in accordance with the Company's accounting policies. Impairment losses on initial classification as held for sale and subsequent gains or losses on remeasurement are recognized in profit or loss, subject to cumulative subsequent gains not exceeding cumulative losses recorded for the asset.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Gains or losses arising from the derecognition of intangible assets are measured as the differences between the net disposal proceeds and the carrying amount of the assets and are recognised in the income statements of the periods in which the assets are.

4.10 Property, plant and equipment

All categories of property, plant and equipment are initially recognized at cost or at fair value. Cost includes expenditure directly attributable to the acquisition of the assets.
Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Repairs and maintenance expenses are charged to the income statement in the year in which they are incurred.

4.8 Investment property

An investment property is property held to earn rentals or for capital appreciation or both. Investment property, including interest in leasehold land, is initially recognized at cost including the transaction costs. Subsequently, investment property is carried at fair value representing the open market value at the statement of financial position date determined by annual valuations carried out by external registered valuers. Gains or losses arising from changes in fair value of investment property shall be recognized in profit or loss for the period in which it arises.

Investment properties are derecognized when either they have been disposed off or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. On disposal of an investment property, the difference between the disposal proceeds and the carrying amount is charged or credited to profit or loss.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use.

When the Company completes the construction or development of a self-constructed investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognized in the other comprehensive income.

4.9 Intangible assets

Software licence costs and computer software that are not an integral part of the related hardware are initially recognised at cost, and subsequently carried at cost less accumulated amortisation and accumulated impairment losses. Costs that are directly attributable to the production of identifiable computer software products controlled by the Company are recognised as intangible assets.

Amortization is calculated using the straight line method to write down the cost of each licence or item of software to its residual value over its estimated useful life. The estimated useful life of the software is four years. Amortization begins when the asset is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management, even when idle.

Amortization ceases at the earlier of the date that the asset is classified as held for sale and the date that the asset is derecognized and ceases temporarily while the residual value exceeds or is equal to the carrying value

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Depreciation is calculated using the straight line method to write down the cost or the revalued amount of each of the following classes of assets to its residual value over its estimated useful life:

• Building	50 years
• Furniture & Fittings	10 years
• Office Equipment	5 years
• Computer equipment	5 years
• Motor Vehicles	4 years
• Generating sets	5 years

Land is a component of property, plant and equipment but not subject to depreciation.
Depreciation on an item of property, plant and equipment commences when it is available for use and continues to be depreciated until it is derecognized, even if during that period the item is idle. Depreciation of an item ceases when the item is retired from active use and is being held for disposal.

As no parts of items of property, plant and equipment of the Company have a cost that is significant in relation to the total cost of the item, the same rate of depreciation is applied to the whole item.

The assets' residual values, depreciation method and useful lives are reviewed and adjusted, if appropriate, at each statement of financial position date.
Impairment reviews are performed when there are indicators that the carrying value of an asset may not be recoverable. Impairment losses are recognised in the income statement as an expense.

The Company classifies all assets within a disposal group as Non-current assets held for sale if the carrying amount will be recovered principally through sale transaction rather than continuous use.

Freehold land and buildings are subsequently carried at revalued amounts. Valuations are done on an annual basis by external independent valuers less accumulated depreciation and accumulated impairment losses. All other items of property, plant and equipment are subsequently carried at cost less accumulated depreciation and accumulated impairment losses.
An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use.

Gains and losses on disposal of property, plant and equipment are determined by reference to their carrying amounts and are taken into account in determining operating profit.
Increases in the carrying amounts arising on revaluation are recognised in other comprehensive income and accumulated in equity under the heading of revaluation reserve. Decreases that offset previous increases of the same asset are recognised in other comprehensive income. All other decreases are charged to the Income statement.

4.11 Statutory deposit

Statutory deposit represents 10% of the minimum paid up capital of the Company deposited with the Central Bank of Nigeria (CBN) in pursuant to Section 10(3) of the Insurance Act, CAP I17, LFN 2004 Statutory deposit is measured at cost.

4.12 Insurance contract liabilities

Insurance contract liabilities include the outstanding claims provision, the provision for unearned premium and provision for premium deficiency. The outstanding claims provision is based on the estimated ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not, together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore, the ultimate cost of these cannot be known with certainty at the reporting date.

The liability is calculated at the reporting date using a range of standard actuarial claim projection techniques, based on empirical data and current assumptions that may include a margin for adverse deviation. The liability is not discounted for the time value of money. No provision for equalisation or catastrophe reserves is recognised. The liabilities are derecognised when the obligation to pay a claim expires, is discharged or is cancelled.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The provision for unearned premiums represents that portion of premiums received or receivable that relates to risks that have not yet expired at the reporting date. The provision is recognised when contracts are entered into and premiums are charged, and is brought to account as premium income over the term of the contract in accordance with the pattern of insurance service provided under the contract.

At each reporting date, the Company reviews its unexpired risk and a liability adequacy test is performed in accordance with requirement of IFRS on liability adequacy test to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premiums.

This calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant non-life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums (less related deferred acquisition costs) is inadequate, the deficiency is recognised in the income statement by setting up a provision for premium deficiency.

- **Liability adequacy test**
  At the end of the reporting period, liability adequacy tests are performed by an actuary to ensure the adequacy of the contractual liabilities net of related deferred acquisition cost assets (DAC). In performing these tests current best estimates of future contractual cash flows and claims handling and administrative expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss initially by writing off DAC and by subsequently establishing a provision for losses arising from liability adequacy tests "the unexpired risk provision".

- **Annuity contracts**
  These contracts insure customers from consequences of events that would affect the ability of the customers to maintain their current level of income. There are no maturity benefits. However, there is a death benefit payable to named beneficiary if death occurs within the ten years guaranteed period. The annuity contracts are fixed annuity plans. Policy holders make a lump sum payment recognised as part of premium in the period when the payment was made. Constant and regular payments are made to annuitants based on terms and conditions agreed at the inception of the contract and throughout the life of the annuitants. The annuity funds are invested in money market instruments to meet up with the payment of monthly/quarterly annuity payments. The annuity funds liability is actuarially determined based on assumptions as to mortality, persistence, maintenance expenses and investment income that are established at the time the contract is issued.

Recognition and Measurement of Annuity Premium and Claims

Annuity premiums relate to single premium payments and are recognised as earned premium income in the period in which payments are received.
Claims are made to annuitants in the form of monthly/quarterly payments based on the terms of the annuity contract and charged to income statement as incurred. Premiums are recognised as revenue when they become payable by the contract holders.

4.13 **Investment contract liabilities**

The Company's investment contract business offers a range of savings products to suits Company and individual customers' long and short term investment needs. It comprises all types of contract, both with or without insurance risk, and with and without discretionary participation features.
The liability of the Company to the schemes is as determined by Actuarial valuation carried out annually by certified actuaries.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.14 Trade payables

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate.

The estimated fair value of payables with no stated maturity which includes no interest payables is the amount repayable on demand.

4.15 Other payables and accruals

General Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

The expense relating to any provision is presented in the income statement net of any reimbursement. If the effect of the time value of money is material, provisions are discounting using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

4.16 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred, Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest rate.

Fees paid on the establishment of loan facilities are recognised as a transaction cost of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

4.17 Finance lease obligations

Asset held under finance leases are initially recognised as asset of the Company at their fair value at the inception of the lease or if lower at the present value of the minimum lease payments. The corresponding liability to the leasor is included in the statement of financial position as a finance lease obligation.

Lease payments are apportioned between the liability and finance charges. The corresponding rental obligation, net of finance charges are included in long term payables. The interest element of the finance cost is charged to the income statement over the lease periods so as to produce constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the useful life of the asset.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.18 Employee retirement benefits

Retirement Benefit Obligations

The Company operates a defined contribution scheme for qualifying employees. The Company contributes 10% while all its employees contribute 8% each of their pensionable emoluments (basic salary, housing allowance and transport allowance) to the Pension Scheme and this is being managed by registered and licensed pension managers as may be chosen by the staff from time to time.

4.19 Income tax liabilities

Income tax expense is the aggregate amount charged/(credited) in respect of current tax and deferred tax in determining the profit or loss for the year. Tax is recognised in the income statement except when it relates to items recognised in other comprehensive income, in which case it is also recognised in other comprehensive income.

Company Income tax

This is the amount of income tax payable on the taxable profit of the Company for the year determined in accordance with the Company Income Tax Act, CAP. C60 LFN, 2004. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as at the reporting date.

Education tax

This is a component of the income tax. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as at the reporting date.

Deferred tax liabilities

Deferred tax is provided in full on all temporary differences except those arising from the fair value measurement of assets.

Deferred tax is determined using the liability method on all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes, using tax rates and laws enacted or substantively enacted at the statement of financial position date and expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss.
Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off such current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same Taxation authority.

4.20 Share capital and share premium.

Ordinary shares are recognized at par value and classified as 'share capital' in equity. Any amounts received over and above the par value of the shares issued are classified as 'share premium' in equity. The share premium account is utilized in accordance with the provisions of Companies and Allied Maters Act 2020.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.21 **Contingency reserves**

This is computed in accordance with the provisions of section 22 of the Insurance Act, CAP 117 LFN 2004. It is credited with amount equal to the higher of 3% of the total premium written and 20% of the net profit for non-life business and the higher of 1% of the total premium and 10% of the net profit for life business until it reaches the amount of the minimum paid up capital.

4.22 **Retained earnings**

Retained earnings are the carried forward recognised income net of expenses plus current period profit or loss attributable to owners of the Company.

4.23 **Gross premium income**

Insurance premium revenue is received or receivable by the Company from in-force insurance contracts during the reporting period. In-force insurance contracts are those whose premiums have been collected by the Company, its intermediaries or collectible within 30 days of the reporting date. Premium revenue is recognized on the date on which the insurance policy commences. Gross premium income comprises the total premium written in a year after adjusting for unearned premiums.

Unearned premiums

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the statement of financial position date. Unearned premiums are calculated on a daily pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

Reinsurance premium

Reinsurance premiums are outward premiums due to reinsurance companies in accordance with the tenor of the reinsurance contract, after adjusting for the unexpired portion, as at the end of the period.

Net premium income

The result of the gross premium income and reinsurance premium expenses is the net premium income accruing to the entity for the period.

4.24 **Commission on reinsurance**

When the Company acts in the capacity of an agent rather than as the principal in a transaction, the revenue recognized is the amount of commission made by the Company. Commission on reinsurance is recognised as income over the period of the underlying contracts. If the fees are for services provided in future periods, then they are deferred and recognised over those future periods.

4.25 **Investment income**

Investment income includes interest on bank placements, dividend income and rental income arising from operating leases on investment properties, which are presented in the Income statement.
Income from any earmarked investment is credited to its source. Otherwise, the investment income is distributed between the Insurance contract business, Investment contract business and shareholders' account on the basis of average investments outstanding during the year as financed by the respective funds.
The distribution is presented only as note to the financial statements.

4.26 **Fees and other income**

Insurance contract policyholders are charged for surrenders and other contract fees. Investment contract policyholders are charged for administration services, investment management services, surrenders and other contract fees. These fees are recognised as revenues over the periods in which the related services are performed. If the fees are for services provided in future periods then they are deferred and recognised over those future periods.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.27 Realized/unrealized gains and losses

Realized gains and losses include gains and losses arising from the disposal of financial instruments, non-current assets held for sale and investment properties and they are recognised in the Income statement of the period in which the disposal occurred.

Unrealized gains and losses include gains and losses arising from the fair valuation of financial assets, non-current assets held for sale (that is, immediately before classification as held for sale) and investment properties. Unrealized gains and losses arising from the fair valuation of investment properties are recognized in the Income statement.

4.28 Underwriting and management expenses

Expenses are recognized in the Statement of profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably. This means, in effect, that recognition of expenses occurs simultaneously with the recognition of an increase in liabilities or a decrease in assets.

The Company's expenses are recognized in the statement of profit or loss on the following basis:

As either directly attributable expenses on insurance contracts and investment contracts on one hand and sundry business activities on the other hand. These expenses are accounted for wholly under the businesses that they relate to;

Common expenses, which are those other than the directly attributable expenses but excluding brokers/ agents' allowances and commissions. The common expenses are allocated in the ratio of 70:20:10 between insurance business, investment contract and shareholders' funds. The amount allocated to insurance contract business is again distributed between Company Life and Individual life on the basis of gross premium written in the year.

Brokers/ Agents' commissions and allowances

The Company employs the services of brokers/ agents in marketing its life policies and investment contracts. Commissions paid to the agents/brokers are charged against revenue as underwriting expenses.

Furthermore, the Company employs the services of agents in marketing its individual life policies and investment contract products. Allowances and commissions paid to the agents are allocated on equal basis between the individual life business and investment contract activities.

Net claims expenses

The result of the gross benefits and claims expenses and reinsurance claims recoveries is the net claims expense for the period. Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders.

Policyholder benefits incurred comprise claims paid in the year and changes in the provision for insurance contract liabilities. Benefits paid represent all payments made during the year, whether arising from events during that or earlier years. Insurance contract liabilities represent the
estimated ultimate cost of settling all benefits accruing to policyholders and are discounted to the present value.

Reinsurance claims recoveries

Reinsurance claims recoveries are recognized when the related gross insurance claim expenses are recognized according to the terms of the relevant contract.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Salvage and subrogation reimbursements

Some insurance contracts permit the Company to sell (usually damaged) property acquired in settling a claim (for example, salvage). The Company may also have the right to pursue third parties for payment of some or all costs (for example, subrogation).

Estimates of salvage recoveries are included as an allowance in the measurement of the insurance liability for claims, and salvage property is recognized in other assets when the liability is settled. The allowance is the amount that can reasonably be recovered from the disposal of the property.

Subrogation reimbursements are also considered as an allowance in the measurement of the insurance liability for claims and are recognized in other assets when the liability is settled. The allowance is the assessment of the amount that can be recovered from the action against the liable third party.

4.29 Dividends

Dividends on ordinary shares are recognised as a liability in the year in which they are declared. Proposed dividends are accounted for as a separate component of equity until they have been declared at an annual general meeting. Dividends for the year that are approved after the statement of financial position date are dealt with as a non-adjusting event after the statement of financial position date.

4.30 Earnings per share

The Company presents basic and diluted earnings per share (EPS) data for its ordinary shares.
Basic earnings per share amounts are calculated by dividing the profit for the year attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding at the reporting date.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held, for the effects of all dilutive potential ordinary shares, which comprise convertible notes and share options granted to employees.

4.31 Conversion of foreign currencies

On initial recognition, all transactions are recorded in the functional currency (the currency of the primary economic environment in which the Company operates or transacts business), which is Nigerian Naira and Kobo. Transactions in foreign currencies during the year are converted into the functional currency using the exchange rate prevailing at the transaction dates.

Monetary assets and liabilities at the statement of financial position date denominated in foreign currencies are translated into the functional currency using the exchange rate prevailing as at that date. The resulting foreign exchange gains and losses from the settlement of such transactions and from year-end translation are recognised on a net basis in the income statement in the year in which they arise.

4.32 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker (Board of Directors). Directors allocate resources to and assess the performance of the operating segments of the Company. The operating segments are based on the Company's management and internal operating structure. The directors consider the Company to comprise three business segments: Company life assurance segment, Individual life assurance segment and Investments management or savings links segment.

SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

4.33 Comparatives

Where necessary, comparatives have been adjusted to conform to changes in presentation in the current year. Where changes are made and affect the statement of financial position, a third statement of financial position at the beginning of the earliest period presented is presented together with the corresponding notes.

4.34 Events after the reporting date

The financial statements are adjusted to reflect events that occurred between the statement of financial position date and the date when the financial statements are authorised for issue, provided they give evidence of conditions that existed at the statement of financial position date. Events that are indicative of conditions that arose after the statement of financial position date are disclosed, but do not result in an adjustment of the financial statements.

NOTES TO THE FINANCIAL STATEMENTS (continued)

5 Critical accounting estimates, judgement and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates under different assumptions and conditions.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.
Information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are described below.

a **Insurance and reinsurance contracts- Life Business**
The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(i) **The methods used to measure insurance contracts future cash flows**
The Company primarily uses deterministic projections to estimate the present value of future cash flows. The following assumptions were used when estimating future cash flows for different class of the company's portfolio:

Mortality, longevity and morbidity rates
Assumptions are based on standard industry and national tables, according to the type of contract written and the territory in which the insured person resides. They reflect recent historical experience and are adjusted when appropriate to reflect the Company's own experiences. An appropriate, but not excessive, allowance is made for expected future improvements. Assumptions are differentiated by policyholder gender, underwriting class and contract type. An increase in expected mortality, longevity and morbidity rates will increase the expected claim cost which will reduce future expected profits of the Company.

Expense
Operating expenses assumptions reflect the projected costs of maintaining and servicing in–force policies and associated overhead expenses. The current level of expenses is taken as an appropriate expense base, adjusted for expected expense inflation if appropriate. An increase in the expected level of expenses will reduce future expected profits of the Company.
The cash flows within the contract boundary include an allocation of fixed and variable overheads directly attributable to fulfilling insurance contracts. Such overheads are allocated to groups of contracts using methods that are systematic, rational and are consistently applied to all costs that have similar characteristics.

Lapse and Surrender rates
Lapses relate to the termination of policies due to non–payment of premiums. Surrenders relate to the voluntary termination of policies by policyholders. Policy termination assumptions are determined using statistical measures based on the Company's experience and vary by product type, policy duration and sales trends. An increase in lapse rates early in the life of the policy would tend to reduce profits of the Company, but later increases are broadly neutral in effect.

(ii) **Discount rate**
The company insurance contract liabilities are calculated by discounting expected future cash flows at a risk-free rate, plus an illiquidity premium where applicable. Risk free rates are determined by reference to the yields published by the Nigerian Actuarial Society of highly rated sovereign securities in the currency of the life insurance contract liabilities. The illiquidity premium is determined by reference to observable market rates, including sovereign debt and corporate debt rates.

NOTES TO THE FINANCIAL STATEMENTS (continued)

5 Critical accounting estimates, judgement and assumptions (cont'd)

(iii) **Risk adjustment for non-financial risk**

The risk adjustment for non-financial risk represents the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows of groups of insurance contracts and covers insurance risk, lapse risk and expense risk. The risk adjustment reflects an amount that an insurer would rationally pay to remove the uncertainty that future cash flows will exceed the best estimate amount.

The Company has estimated the risk adjustment using a confidence level (value at risk) approach in which a full IFRS 17 liability distribution is generated across all non-financial risks and risk adjustment is calculated as the difference between the best estimate liability and the liability value at the chosen confidence level.

(iv) **Amortisation of the Contractual Service Margin (CSM)**

The CSM is a component of the asset or liability for the group of insurance contracts that represents the unearned profit the Company will recognise as it provides services in the future. An amount of the CSM for a group of insurance contracts is recognised in profit or loss as insurance revenue in each period to reflect the insurance contract services provided under the group of insurance contracts in that period. The amount is determined by:

- Identifying the coverage units in the group
- Allocating the CSM at the end of the period (before recognising any amounts in profit or loss to reflect the insurance contract services provided in the period) equally to each coverage unit provided in the current period and expected to be provided in the future.
- Recognising in profit or loss the amount allocated to coverage units provided in the period

The number of coverage units in a group is the quantity of insurance contract services provided by the contracts in the group, determined by considering the quantity of the benefits provided and the expected coverage period. For groups of the company's life insurance contracts, the quantity of benefits is the contractually agreed sum assured over the period of the contracts. The total coverage units of each group of insurance contracts are reassessed at the end of each reporting period to adjust for the reduction of remaining coverage for claims paid, expectations of lapses and cancellation of contracts in the period. They are then allocated based on probability-weighted average duration of each coverage unit provided in the current period and expected to be provided in the future.

Expected release of Contractual Service Margin for insurance contracts issued

CSM with positive sign

Expected release of Contractual Service Margin	Annuity	Endowment	Total
Year 1	1,673	3,971	**5,644**
Year 2	1,673	1,390	**3,063**
Year 3	1,672	1,121	**2,794**
Year 4	1,665	0	**1,665**
Year 5	1,635	0	**1,635**

Year 8	1,408	0	**1,408**
Year 9	1,357	0	**1,357**
Year 10	1,306	0	**1,306**
Above Year 10	7,211	0	**7,211**
Total CSM	**22,675**	**6,482**	**29,157**

NOTES TO THE FINANCIAL STATEMENTS (continued)

5 Critical accounting estimates, judgement and assumptions (cont'd)

(v) **Assets for insurance acquisition cashflows**

The Company applies judgement in determining the inputs used in the methodology to systematically and rationally allocate insurance acquisition cash flows to groups of insurance contracts. This includes judgements about whether insurance contracts are expected to arise from renewals of existing insurance contracts and, where applicable, the amount to be allocated to groups including future renewals and the volume of expected renewals from new contracts issued in the period.

(b) Insurance and reinsurance contracts- Non-Life Business

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

The Company applies the premium allocation approach (PAA) to simplify the measurement of insurance contracts.. For cashflows that are not expected to be settled more than one year after the claims is incurred, the company has elected not to discount such cashflows.

(i) Claims payment pattern for liability for incurred claims

In estimating the claims payment pattern for liability for incurred claims, the company sets:

An assumption regarding the future timing of claim settlement is required as the IFRS 17 requires the determination of probability weighted future cash flows. Weighted future cash flows will include expected claim payment, expected cost of settling the claims, unallocated claim expenses that are integral to the claim cost but due to system limitations they cannot be allocated to individual claims (e.g. cost of pool of contract cars), legal costs incurred or expected to be incurred for litigated claims, motor recoveries from third party insurers, salvage and subrogation and directly attributable maintenance expenses. For reinsurers' LIC, same cashflows shall apply as described above but the cashflows are apportioned according to reinsurance arrangement.

Run off triangles are used to project future claims payment generated by direct insurance contracts and claim recovered from reinsurance contracts. Actual claims paid and outstanding claim reserves are grouped by accident year cohorts. Methodology used for claims reserving is defined by the Company's Reserving Policy and Reserving Guidance, and it relies on the Basic Chain Ladder as well as the Bornhuetter- Ferguson method. Same methodology is applied to claims generated by direct contracts and claim recovered from reinsurance contracts.

The best estimate for claims development or payment to ultimate is determined by the link ratio estimator for each period of development. This is achieved by selecting the weighted averages or simple averages of link ratios for each period of claims development until the ultimate period when the claims development is deemed to be fully run off. For each reserving class that best estimate claim payment pattern is derived separately on a gross basis Insurance contracts and reinsurers' share (claim recovered from reinsurance contracts). The process of selecting link ratios often involves identifying outliers and excluding them.

Analysis of Actual versus Expected claim reserves is carried out to assess adequacy of best estimate payment pattern estimated in prior year/period. Where significant deviations are noted, further investigations are carried out to ascertain whether this is indicative of a new trend in the underlying claim development process or whether this is caused by the occurrence of abnormally large claims that tend to distort the latest link ratios or whether it was caused by certain specific events impacting the claims process that are not expected to recur in the future (e.g. restructuring of claims department, or installing a new admin system or claim backlog). If the cause of the deviation is driven by changes in the claims development process which is expected to be recurring or be permanent in the future (e.g. application of new case reserving practice), then judgement is applied in choosing the link ratio for the most recent accident year cohort.
Consideration is also given on the need to allow for a tail factor for projecting claims payment beyond the available data horizon.

NOTES TO THE FINANCIAL STATEMENTS (continued)

5 Critical accounting estimates, judgement and assumptions (cont'd)

For non-liability claims, the ultimate period is often within 7 - 10 year unless- tail factor is not required.

-Claim payment pattern will be derived for each reserving class or portfolio (portfolio if there is only one reserving class).
- Basically, the payment pattern provides probabilities to project the settlement of claims in future time periods.
For a given portfolio or reserving class, same payment pattern will be applied to project the payment of OCR (outstanding claim reserve),
- IBNR reserve and Risk Adjustment estimates over future time periods.
Existing reserving models (primarily the Basic Chain Ladder) will be used to derive the payment probabilities from the link ratios obtained from paid triangles.
- Pattern will be derived once a year, that is, at the year-end valuation. It is expected that same payment pattern will be used in the LIC cashflow modelling for interim valuation periods and roll forward.

- However, for reserving class or portfolios which exhibit significant volatility, payment pattern might be reviewed and revised more frequently and also pattern used in LIC model will need to be updated. A change in payment pattern will lead to a change in fulfilment cashflows arising from non-financial assumption change. This change or delta in fulfilment cashflow will be accounted for as an insurance service expense.
Changes of payment pattern during a financial year will only be considered if justified by facts and circumstances. Examples of facts and circumstances could be as follows:
i. major changes in claim reporting and settlement processes that would invalidate existing payment pattern (e.g. non-life claims backlog can be quite common arising from dispute in settlement amount or change in policy administration system.
ii. occurrence of major external systemic events such as a pandemic related lockdown will impact the development factors- hence invalidate existing payment pattern.

It is to be noted that, for consistency, the same payment pattern as used for claim projection will be applied in the projection of Risk Adjustment estimates. The same approach would be used to derive the payment pattern for modelling the LIC cashflows for a portfolio of reinsurance contracts.

Moreover, it is required to allocate the projected OCR, IBNR and RA to issue year cohorts /underwriting year cohorts. This will necessitate the application of an allocation driver. Projected IBNR, OCR and RA cashflows will be allocated to underwriting year by making use of weights. Weights, as a proxy for coverage, for each underwriting year will be derived from earned premium /revenue (as computed for the LRC). For internal reporting needs, further allocation of IBNR, OCR and RA (risk adjustment) down to more granular levels (issue year cohorts/distribution channels/ cover-section/ client types) will be required. Earned premium weights, as described above, will also be used for a more granular allocation of projected OCR, IBNR and RA.

(ii) Insurance acquisition cash flows
For the company's PAA eligible contracts, the company is eligible to recognize insurance acquisition cashflows as an expense immediately as incurred or amortize it over the coverage period. The company will make this choice on a portfolio basis. Where the company has not recognized an expense immediately, the company allocates insurance acquisition cash flows to related groups of insurance contracts recognised in the statement of financial position (including those groups that will include insurance contracts expected to arise from renewals). An asset for insurance acquisition cash flows is recognised for acquisition cash flows incurred before the related group of insurance contracts has been recognised.

The effect of electing to recognise insurance acquisition cash flows as an expense when incurred for a group of insurance contracts is to increase the liability for remaining coverage and reduce the likelihood of any subsequent onerous contract loss. There would be an increased charge to profit or loss on incurring the expense, offset by an increase in profit released over the coverage period.

Onerous groups
For groups of contracts that are onerous, the liability for remaining coverage is determined by the fulfilment cash flows. Any loss-recovery component is determined with reference to the loss component recognised on underlying contracts and the recovery expected on such claims from reinsurance contracts held.

NOTES TO THE FINANCIAL STATEMENTS (continued)

5 Critical accounting estimates, judgement and assumptions (cont'd)

(iii) Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows of groups of insurance contracts. The risk adjustment reflects an amount that an insurer would rationally pay to remove the uncertainty that future cash flows will exceed the expected value amount.

The Company has estimated the risk adjustment using a confidence level (value at risk) approach in which a full IFRS 17 liability distribution is generated across all non-financial risks and risk adjustment is calculated as the difference between the best estimate liability and the liability value at the chosen confidence level.

The valuation of the long term insurance contract liabilities was done by Awunor Benjamin Ebube (FRC/2015/PRO/NAS/004/00000012946) of Becoda Consulting (FRC/2015/NAS/00000012946).

The Liability Adequacy Test (LAT) was carried out by Awunor Benjamin Ebube (FRC/2015/PRO/NAS/004/00000012946) of Becoda Consulting (FRC/2015/NAS/00000012946). The claims reserve was calculated using the Discounted Inflation Adjusted Basic Chain Ladder method.

NOTES TO THE FINANCIAL STATEMENTS (continued)

		2023 N'000	2022 N'000	2021 N'000
6.2.1b	**Movement in loans against policies**			
	At 1 January	**69,679**	69,125	69,125
	Additions during the year	**-**	-	-
	Repayments	**(554)**	554	554
	At 31 December	**69,125**	69,679	69,679
6.2.1c	**Movement in staff debtors**			
	At 1 January	**1,227**	1,227	1,227
	Additions during the year	**-**	-	-
	Repayments during the year	**-**	-	-
	At 31 December	**1,227**	1,227	1,227
6.2.2	**Treasury bills**			
	At 1 January	**-**	336,268	393,491
	Matured and transferred to short-term deposit	**-**	(336,268)	(57,425)
	Reversal/(allowance) for credit losses (Note 36a)	**-**	-	202
	At 31 December	**-**	-	336,268

The Company's existing treasury bills matured during the year. The sum of N57.425 million of the proceeds was invested in short-term deposits, while the balance of N336.27 million was reinvested in 90-day tenored treasury bills to mature on 24 February 2022. In 2022, bills were liquidated and deposited in a bank.

		2023 N'000	2022 N'000	2021 N'000
6.2.3	**Bonds**			
	At 1 January	**534,488**	534,488	-

During the year, the company invested in FGN and corporate bonds with a maturity date of 6 to 7years. These investments are measured at amortised cost using the effective interest rates of 13% and 16.288%. The interests are accrued biannually and paid into Zenith Bank, UBA, and Access Bank.

		2023 N'000	2022 N'000	2021 N'000
	ECL allowance on amortised costs charged to profit or loss during the year is shown below:			
	ECL allowance on treasury bills	**-**	-	
	ECL allowance on loans and receivables	**-**	-	
	Charged to profit or loss during the year	**-**	-	-
6.3	**Financial assets at fair value through other comprehensive income**			
	Quoted Shares in Transcorp Plc (Note 6.3.1)	**1,532,639**	200,080	175,291
6.3.1	**Investment in quoted shares (Transcorp Plc)**			
	At 1 January	**200,080**	175,291	159,356
	Fair value gain during the year (Note 29)	**1,332,559**	24,789	15,935
	At 31 December	**1,532,639**	200,080	175,291

As at 31st December 2023, the Company had 177,062,222 units of Transcorp Plc shares valued at N1.53 billion (2022: N200.08 million)

		2023 N'000	2022 N'000	2021 N'000
7	**Reinsurance assets**			
	Reinsurer share of outstanding claims (Note 7.1)	**-**	-	**-**
	Reinsurer's share of claims IBNR (Note 7.2)	**-**	-	**-**
	Reinsurer's share of UPR (Note 7.3)	**-**	-	-
		-	**-**	**-**

During the year, the company wrote off reinsurance assets amounting to $324.037 million due to insufficient data to validate the transactions and determine their recoverability. This write-off reflects the company's inability to reliably measure the value of these assets.

NOTES TO THE FINANCIAL STATEMENTS (continued)

	2023 N'000	2022 N'000	2021 N'000
7 **Reinsurance assets - cont'd**			
7.1 **Reinsurer share of outstanding claims**			
Non-life business claims recoverable	-	-	-
	-	-	-
Movement in claims recoverable during the year is as follows:			
At 1 January	-	-	255,100
Write off during the year (Note 32a)	-	-	(255,100)
At 31 December	-	-	-

Claims recoverable represents balances due from re-insurance companies in respect of claims paid. During the year, the Company did not carry out a reconciliation of claims recoverable with its reinsurers due to the suspension of its operation licence. Meanwhile, the assets were written off during the year, which reduced the value to nil (2022 N210.9 million) in claims recoverable as at the reporting date.

	2023 N'000	2022 N'000	2021 N'000
7.2 **Reinsurer's share of IBNR**			
Life business IBNR	-	-	-
Non-life business IBNR	-	-	-
Write off during the year (Note 32a)	-	-	-
	-	-	-
Movement in Reinsurer's Share of IBNR during the year is as follows:			
At 1 January	-	-	101,023
Write off during the year (Note 32a)	-	-	(101,023)
At 31 December	-	-	-
7.3 **Reinsurer's Share of UPR**			
Life business UPR	-	-	-
Non-life business UPR	-	-	-
	-	-	-

Net closing balance	2,121,074	-	1,078,250	116,896	29,157	3,345,376

The result shows that some of the contracts are onerous and have been disclosed in the analysis of movement.
As can be seen in this analysis, there are components of the analysis that represents the components of the profit and loss account, for example, insurance revenue and insurance service expense. The figures in the movement must reconcile with these items in the P&L.

The tables below show

Addition during the year	**-**	-	-
At 31 March	**7,484,955**	7,484,955	7,667,475

Share premium comprises additional paid-in capital in excess of the par value.
This reserve is not ordinarily available for distribution.

26 Contingency reserves			
At 1 January	**1,775,727**	1,768,800	1,756,720
Charge for the year (Note 27)	**4,669**	6,927	12,080
At 31 March	**1,780,397**	1,775,727	1,768,800

In compliance with section 21(1) of Insurance Act 2003, the contingency reserve for Non-life insurance business is credited with the greater of 3% of total premium, or 20% of the net profits. This shall accumulate until it reaches the greater of minimum paid-up capital and 50% percent of the net premium. For life business, the contigency reserve is credited with an amount equal to 1% of gross premium or 10% of net profit (whichever is greater) and accumulated until it reaches the amount of mimimum paid-up capital.

NOTES TO THE FINANCIAL STATEMENTS (continued)

26 **Contingency reserves - cont'd**

As required by insurance regulations, a contingency reserve is maintaned for both the non-life insurance and life assurance contracts underwritten by the Company. The appropriation to contingency reserve reserve for non-life underwriting contracts is calculated in accordance with sections 21 (2) and 22 (1) of the Insurance Act 2003. The reserve is calculated at the higher of 3% of gross premium and 20% of net profits of the business for the year. The appropriation to contingency reserve for life underwriting contracts is calculated at the higher of 1% of the gross premium and 10% of net profits of the business for the year. The appropriations are charged to the life fund.

41 **Basic (loss)/earnings per share**

Basic loss per share is calculated by dividing the net loss attributable to ordinary shareholders by the weighted average number of ordinary shares in issue during the year.

Loss for the year (N'000)	**(1,832,545)**	(1,373,425)
Number of shares ('000)	**12,911,030**	12,911,030
Basic loss per share (Naira)	**(14.19)**	(10.64)

42 **Going concern of Company**

The events and conditions listed below indicate that there may exist material uncertainty that cast doubt on the Company's ability to continue as a going concern entity within a foreseeable future:

i. Shortfall of existing ₦5billion regulatory minimum paid-up capital of the Company by ₦9.818 billion as at 31 March, 2023;

ii. Accumulated losses of ₦21.956 billion (2022: ₦19.768 billion) as at 31 March, 2023, which resulted in negative equity of the Company of ₦4.818billion as at 31 March, 2023;

iii The high impairment allowances over the years on the Company's investment properties suggesting possible inability to realize them and discharge its liabilities in the normal course of business; and

iv. Significantly reduced staff workforce and low morale of staff

Management is however executing mitigating procedures and are working assiduously to inject fresh capital through a recapitalization and business restructuring plan involving major prospective investors.

NOTES TO THE FINANCIAL STATEMENTS (continued)

43 **Events after reporting period**

Introduction of a new investor

On the 5th of January 2022, an Investor, QPI Consultants FZE through a special purpose vehicle (SPV) named Endura Investment Global Limited (EIG) showed interest in obtaining regulatory approval for the purchase of 3,140,774,908 ordinary shares in Standard Alliance Insurance Plc at N0.01 each. Purchase of the shares will give the new investor 26.4% of the issued capital of the Company. The investor will be in a position to restructure the business and turn it around with a minimum amount of U$8million. Subsequently, the transaction was consummated on the 19th of August 2024 with the approval of the Nigerian Exchange Limited (NGX).

Cancellation of Certificate of Registration and Authorization to Continue to carry on Insurance Business.

The National Insurance Commission (NAICOM) revoked the certificate of registration of Standard Alliance Insurance Plc, effective from June 21, 2022. Consequent upon a judgement of the Federal High Court delivered on the 7th July, 2023, reversing the revocation of the Company's licence and the Company application for No-objection for the acquisition of its shares by Endura Investment Global Limited, on 18th December 2023, NAICOM provisionally authorised the Company to continue to carry on insurance business in accordance with its certificate of registration subject to satisfaction of other conditions, eg approval of other relevant regulatory bodies, final court order authorising the acquisition.

Change of company's name

At the Extra-Ordinary General Meeting of the company held on 4th April 2025, the shareholders approved the change of the Company's name from Standard Alliance Insurance Plc to Fortis Global Insurance Plc. In 25th April 2025, the Corporate Affairs Commission awarded a certificate of Registration to the Company.

44 **Fair value Hierarchy**

The Company's fair value measurements model is highlighted in accounting policy 4.2.

Level 1

Fair value measurements classified as level 1 include fair values of quoted investments based on current market prices.

Level 2

Fair value measurements classified as level 2 include fair values of unquoted investments which the Company established using valuation techniques such as:

- recent arm's length transactions
- reference to other instruments that are substantially the same
- net assets value and
- discounted cash flows

Level 3

Fair value measurements classified as level 3 include fair values of financial assets of which there are no active markets and no observable inputs. They comprise loans and other receivables.

The table below highlights financial instruments in their various fair value hierarchies at year end:

2023 Asset type	**Total N'000**	**Level 1 N'000**	**Level 2 N'000**	**Level 3 N'000**

47 **Contingent liabilities**
Material contingent liabilities have been made or are likely to be made in these financial statements.

48 **Related party transactions**
Related parties include the related Companies, the directors and any employee who is able to exert significant influence on the operating policies of the Company. Key management personnel are also considered related parties. Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity.

During the year under review, there were no material transactions between related parties. Transactions with related parties are as stated in note 45 above.

49 **Events after the reporting period**
There were no events after the reporting period which could have material effect on the financial position of the Company as at 31 MARCH2023 or the profit or loss and other comprehensive income for the year then ended which have not been disclosed.

49 RISK MANAGEMENT REPORT

A) Introduction and overview

The Company was faced with the following risks in its operations.

i Capital Adequacy risk
ii Regulatory risk
iii Liquidity risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risks.

Risk Management Philosophies and Principles

The following principles guide financial risk management in the Company:

i. A deliberate and conscious management of the Company's investment portfolio to ensure that the risk of excessive concentration on any one class, industry, or sector is minimized, as well as to ensure portfolio flexibility and liquidity.

ii. A strict adoption of sound internal policies and processes resulting in consistent adherence to investment guidelines issued by the National Insurance Commission to enable the Insurance industry maintain sound solvency margin and sound liquidity health at all times.

iii. The Executive Management took responsibility for establishing a robust liquidity management framework consistent with regulatory requirements of the Commission that ensures sufficient liquidity to withstand a range of stress events.

iv. The financial risk procedural manual spell-out the operational steps and procedures for executing relevant controls to prevent the occurrence or reduce the impact of risk events touching on Financial and strategy risk. The manual is being reviewed periodically reviewed and updated to take into account new activities, system changes, and structural changes in the industry.

v. The Board approves all strategies and policies in respect of financial and strategic risk management.

vi. Evaluation of the effectiveness of risk management process and the internal control system shall be carried out by external consultants periodically.

vii. The Company relies on its Risk Management Committee

viii. It develops early warning indicators to aid the prompt identification of all risks from all of the risk categories

Risk Management Strategy

The Board and Management has put in place clearly defined financial risk management framework that provides the Company with guidance and prescribes tolerable financial risk related losses considering available capital and levels of other investment risk exposures. The Company's financial risk policy and strategy are anchored on the following:

i. Investment portfolio diversification which involves the application of the Company's investible funds in a wide range and class of financial instruments consistent with Regulatory Requirements.

ii. Liquidity risk Management taking within well defined limits with the sole purpose of creating and enhancing liquidity and competitive advantage,

iii. Effective utilization of Company's liquidity position.

Risk Management Framework

The Standard Alliance Insurance Plc recognizes the presence of financial risk in its process of delivering value to its stakeholders. This financial risk Management Framework is set out to manage financial risks resident in the investment processes and procedures of the company. It provides guidance on related issues of Identification, Measurement, Monitoring and Reporting of financial risks in order to ensure the Company continually meets its contractual liabilities to policy holders.

The Company recognizes the importance of these classes of risks, which is inherent in the investment, market, and liquidity management of its insurance business. This policy contains guidelines to help the Company manage its assets in a sound and prudent manner, taking account of the profile of its liabilities, its solvency position and its risk return profile.

The Company's financial risk shall be managed within tolerable limits through an appropriate management focus and deployment of resources.

Risk Management Governance

The overall responsibility for the management of financial risk shall resides with the Board through its Risk and Remuneration Committee. To ensure consistency and prudent management of financial risks, this responsibility shall be divided as follows:

i. Board of Directors/ Risk & Remuneration Committee
ii. Finance and Investment Committee of the Board
iii. Executive Management Committee on Investment
iv. ERM Committee/CRO
v. Finance and Investment Department.
vi Quality Assurance and Control

Risk Tolerance/Appetite

The Company shall operate by managing its risks within acceptable bounds so as to maintain and increase the value of its resources for its stakeholders. An explicit discussion of risks and risk tolerance will be part of the STANDARD ALLIANCE INSURANCE's decision making process.

STANDARD ALLIANCE INSURANCE has defined Enterprise risk appetite at two levels:

i. The enterprise level; and
ii. The Business/Support/Functional Unit levels

The ERM Committee set target key performance indicators ("KPI's") at both an enterprise and a business/support unit level based on recommendations from the Chief Risk Officer. Target KPI's is reviewed at least on annual basis.

At the Business and Support unit levels, the enterprise KPI's is cascaded to the extent that the contribution of each Business/Support Unit to enterprise risk shall serve as input for assessing the performance of the Business/Support Unit.

Tolerance levels is defined for each key risk indicator and serves as a proxy for the risk appetite for each risk area and Business/Support Unit.

Tolerance levels is subject to approval of ERM Committee and shall be reviewed on a periodic basis to reflect changing circumstances.

Risk Management Process

The Company's disciplined approach to risk management is iterative, scalable, and includes the steps below. Consistent application of this process enables continuous improvement in decision making and performance by top Management. The process as follows:

1. Communication and Dialogue: Communication and dialogue with internal and, as appropriate, external stakeholders as far as necessary takes place at each stage of the risk management process.
2. Establishing the Context: This defines risk parameters to be taken into account when managing risk, and setting the scope and risk criteria for the remaining process.
3. Risk Identification: This process helps the company develop a comprehensive list of risks based on those events that might enhance, prevent, degrade, or delay the achievement of the objectives.
4. Risk Analysis: This context helps to understand the causes and sources of risk, their positive and negative consequences, and the likelihood that those consequences can occur. Existing risk controls and their effectiveness should be taken into account and communicated.
5. Risk Evaluation: The purpose of risk evaluation is to assist in making decisions based on the outcomes of risk analysis about which risks need treatment and to prioritize treatment implementation for those unacceptable risks (i.e. those that exceed risk tolerance)
6. Risk Treatment: This involves the selection of one or more options for modification of unacceptable risks and implementing those options. Risk treatment options include: avoiding the risk, seeking out an opportunity, removing the source of risk, changing the likelihood, changing the consequence, sharing the risk with another party, and retaining the risk by choice.
7. Monitoring and Review: This step should encompass all aspects of the risk management process to:

i. Analyze and learn lessons from events, changes, and trends.
ii. Detect changes in the external and internal context including changes to the risk.

Risks/ events shall be identified and analyzed against the broad success criteria which may be affected.

The focus in risk identification is capturing all the possible risks associated with an event, activity, project, roles or management decisions. It also covers the impact of an event occurring on the identified success criteria.

i. Element of Risk- Description of the risk engaged within a process and event or a role.
ii. Impact on business- Details the consequences of a risk occurring upon the related success criteria.
iii. Mitigation Measures- Details controls already established or in the process of being established.
iv. Responsibility- Identifies the officer and department responsible for the implementation and monitoring of compliance of the prescribed controls

B) **Financial Risk Assessment**

Risks is measured in terms of likelihood and consequences on both inherent and residual basis (pre and post controls). Both likelihood and consequences may be measured qualitatively or quantitatively depending on the risks being considered.

The criteria for success adopted by the Company are;

i. Shareholders' funds
ii. Market Share
iii. Company's image
iv. Revenue growth
v. Employees welfare
vi. Solvency Margin
vii. Customer Service

The impact of risk against this success criteria form the basis for the development of the consequence rating scale. The specific evaluation criteria adopted in this document is:

Consequence rating scale

No	Rating	Consequence (impact on established success criteria)	Quantification
1	Catastrophic	Shareholder's fund depleted, license withdrawn and liquidation imminent	>/= 10% of Shareholders' fund
2	Major	Most success criteria threatened or one severely affected	5% - < 10% of shareholders' fund
3	Moderate	Some success criteria affected, considerable effort being made to rectify	1% - < 5% of shareholders' fund
4	Minor	Easily remedied, criteria can be recovered	0.5% - < 1% of shareholders' fund
5	Negligible	Very small impact, rectified in the course of normal processes	< 0.5% of shareholders' fund

Likelihood rating scale

No	Rating	Interpretations
1	Almost certain	More than 50% change that it will happen during the year and may occur several
2	Likely	50% change that it will happen during the year
3	Possible	Less than 50% chance that it will happen during the year
4	Unlikely	Could occur once over a 5-10 year period
5	Rare	Very unlikely over a 10 year period

a) **Market Risks**

Market risk refers to worsening financial condition arising from adverse movements in the level of volatility of market prices. It involves the exposure to movement of financial variables such as; equity prices, interest rates or exchange rates. It is usually introduced into a Standard Alliance Operation through variations in financial markets that cause changes in asset values, product or portfolio valuation. Some of the events under market risks are:

i. Movement in interest rates to the extent that future cash flows from the assets and liabilities are not well matched.

ii. Movement in market values of equity, real estate and other assets to the extent that the company is exposed to changes in market value.

iii. Movement in exchange rates which may result in losses from asset and liabilities denominated in different currencies.

b) **Credit Risks**

Credit risk refers to the risk of financial losses arising from default or movement in the credit quality of issuers of security, debtors, or counterparties and intermediaries to whom the company has exposures. Such risk events are:

i. Default Risk: Risk that a company will not receive or receipts delayed or partially the cash flow or assets to which it is entitled because the other parties default in one or more obligations. This risk has been substantially eliminated by the regulations No Premium, No Cover policy.

ii. Concentration Risk: Risk of increased exposure to losses due to concentration of investments in a geographical area, economic sector, counterparty, or connected parties.

iii. Downgrade or Migration Risks: Risks that change in the probability of a future default by an obligor will adversely affect the present value of the contract with the obligor today.

iv. Indirect or Spread Risks: Risk due to market perception of increased risk on either a macro or micro basis.

c) **Liquidity Risks:**

Liquidity risk refers to the risk that a Company, though solvent has insufficient liquid assets to meet its obligations as they fall due. Liquidity is concerned with the current and future maintenance of appropriate levels of cash and liquid assets. Such risk events are:

i. Liquidation Value Risks: The risk that unexpected timing or amount of needed cash may require the liquidation of asset when market condition may result in loss of realized value.
ii. Affiliated Investment Risk: The risk that an investment in the Company may be difficult to sell or that such affiliate may create a drain on the financial or operating resources of the Company.
iii. Capital Funding Risks: The risk that the company will not be able to obtain sufficient outside funding as its assets are illiquid at the time of need.
iv. Negative Publicity with unexpected liquidity strain.
v. Negative Report about other companies in similar trade.
vi. Deterioration of the Economy.
vii. Abnormally volatile or stressed market.

Identification of Financial Risk

The various risk types identified under financial risk category as used in this policy are:

Market Risks	Credit Risks	Liquidity Risks	
Interest Rate	Concentration Risk	Liquidation Value	
Equity	Default Risk	Affiliated Investment	
Real Estate	Indirect or spread Risks	Capital Funding	
Currency	Downgrade or Migration Risks	Negative Publicity	

Role of the CRO in conjunction with the finance/ Investment risk manager:

i. Strive to anticipate the risks inherent in the above listed indicative factors and propose appropriate preventive measures.
ii. Document the anticipated risks and reports to the ERMC for appropriate response and implementation.

Assessment of Financial Risk

i. The Company measures its financial risk exposures across risk types, risk factors and overall investment portfolio
ii. The Company documents the appropriate products to be used to hedge exposures, the item that qualifies to be hedged, how hedging instruments effectiveness shall be assessed and identify individuals responsible for monitoring hedge performance
iii. The Company has set appropriate limit structure to control its financial risk exposures.
iv. The Company periodically reviews its financial risk limits to verify its suitability based on current market conditions, economic conditions and its overall risk tolerance
v. The Company applies its stress testing to determine the potential effect of economic shifts, market events, changes in interest rates, changes in foreign exchange and changes in liquidity conditions

Internal Risk Identification and Assessment

Internal risk relate to risks that have their sources in faulty or deficient internal systems, process or negligence or indolence of persons responsible for such roles. Such risk resides within the financial management system of the Company.

Internal Risk Identification and Assessment - cont'd

i. Internal Processes
ii. Reporting System
iii. Bank reconciliation practices
iv. Budget preparation and monitoring
v. Working capital management

Financial risks also reside within financial processes, people in financial management, compliance levels, Reporting system, control processes.

External Risk Identification and Assessment

External risks relate to risks that are exogenously determined and impact directly on the financial health of the company. Such risks can arise from the following;

i. Changes in regulation
ii. Changes in currency and exchange rate
iii. Changes in interest rate
iv. Changes in capitalization and Solvency Margin.
v. Changes in shareholder's structure and composition
vi. Changes in money and capital markets

Risk & Control Self Assessments

Risk control self assessment of existing, newly identified and emerging financial risk should be carried-out regularly, at least once every quarter.

i. For every Control-based financial risks such as fraud, the CRO in conjunction with the finance/ Investment managers risk shall;

a Identify the control structure
b Compare the control structure to a best practice model
c Identify the gaps
d Recommend and implement new controls.

Risk Ratings

The CRO in conjunction with the finance/ Investment risk managers
Ensure every risk identified and assessed is given the right risk priority rating for effective treatment.

Key Risk Indicators

Management considers several factors as indicative of the presence of financial risks across the organization. Some of these indicative factors are:

Market Risks – KRIs	**Credit Risks – KRIs**	**Liquidity Risks - KRIs**
Interest rate fluctuations	Increasing receivables	Earnings volatility
Proportion of debt to equity	Changes in debt profile	Asset coverage
Decline in market values	Frequency of settlement failure	Liquidity ratio
Guaranteed value losses	Connected or affiliated	Cash flow modelling
Changes in exchange rate	Financial trends	Frequency of Cash conversion
Rising inflation	Counterparty exposures	Working Variations in capital

Risk Mitigation

a. Insurance

i. The finance/ Investment risk manger brings to the attention of the Head Administration department every risk emanating from investment operations that ought to be insured (refer to the risk register for financial risks that are mitigated through insurance)
ii. The Administration Manager ensures that premium due for all insurances are dully paid
iii. The finance/ Investment risk manager shall advise the administration department of any insurance that is no longer required.

Risk Mitigation - cont'd

b. Consultancy

All consultancy services relating to financial risk shall have contract which clearly states the terms of engagement of the consultant.

The Chief risk officer shall ensure that the contract arising from all consultancy services covers the following;

Standard Level Agreement (SLAs) which;

i. details the minimum level of performance/quality required from the consultants
ii. clearly delineates the risks to be borne by the consultant
iii. clearly specifies the penalty for default

Risk Reporting

Financial Risk Management requires an organization to have an effective risk reporting process reflecting the up-to-date status of risk issues within the Company.

i. Such report should define the responsibility for production of investment report, the layout of each of the reports, timing of production and delivery, presentation of result, basis evaluation, etc.
ii. Report should be analyzed to improve existing risk management performance, evaluate the impact of financial risk breaches and monitor compliance with risk appetite levels.
iii. Separate report should be generated for each of the three major risk types: Market, Credit and Liquidity Risk.

Risk Reporting Template

The periodic report should include the following:

i. Details of investment activities during the period under reference
ii. Commentary on each of the investment activity
iii. Details of portfolio positions by asset type
iv. Concentration analysis of portfolio and/or credit exposures
v. Details of any regulatory or internal limits breached during the period
vi. Actions taken on such if any
vii. Planned future investment activities

C) **Capital management**

The Company's capital management framework is designed to ensure that the company is capitalised in line with the risk profile, regulatory requirements, economic capital standards and target ratios approved by the board. The capital management objectives of the company are to:

- maintain sufficient capital resources to meet minimum regulatory capital requirements set by NAICOM
- maintain sufficient capital resources to support the company's risk appetite and economic capital requirements;
- support the company's credit rating;
- maintain adequate capital to support the development of its business and to enable it continue as a going concern, while at the same time maximising the return to its shareholders.
- allocate capital to businesses to support the company's strategic objectives, including optimising returns on economic and regulatory capital;
- ensure the company holds capital in excess of minimum requirements in order to achieve the target Capital Adequacy Ratios set by management and to withstand the impact of potential stress events; and
- manage the net asset value currency management process, including evaluating and implementing new derivative instruments that could be used for hedging purposes;

Capital Management Strategy

The Company's Enterprise Risk Management (ERM) committee ensures compliance with the Company's capital management objectives. The committee reviews actual and forecast capital adequacy on a regular basis. The processes in place for delivering the Company's capital management objectives are:

- establish internal targets for capital adequacy;
- apply stress tests to assess the Company's capital adequacy under stress scenarios;
- plan and forecast capital requirements to ensure that capital ratios exceed the targets set by the Board.

In addition to these processes, the board, through the ERM Committee, review and set risk appetite annually and analyse the impact of stress scenarios to understand and manage the Company's projected capital adequacy.

The Company has had no significant changes in its policies and processes to its capital structure during the year under review through effective selection of investment platforms and has shown concerns over strict compliance with NAICOM investment guidelines.

Expected Credit Loss Impairment Model for financial assets:

The Company's allowance for credit losses calculations shall be outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. The expected credit loss impairment model reflects the present value of all cash shortfalls related to default events either over the following twelve months or over the expected life of a financial instrument depending on credit deterioration from inception. The allowance for credit losses reflects an unbiased, probability-weighted outcome which considers multiple scenarios based on reasonable and supportable forecasts.
The Company shall adopt a three-stage approach for impairment assessment based on changes in credit quality since initial recognition

Stage1–Where there has not been a Significant Increase in Credit Risk (SICR) since initial recognition of a financial instrument, an amount equal to 12months expected credit loss shall be recorded .The expected credit loss shall be computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to remaining term to maturity shall be used.

Stage2–When a financial instrument experiences a SICR subsequent to origination but is not considered to be in default, it shall be included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
Stage3–Financial instruments that are considered to be in default shall be included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

Measurement of Expected Credit

Losses: The probability of default (PD), exposure at default (EAD) ,and loss given default (LGD) inputs used to estimate expected credit losses shall be modelled based on macroeconomic variables that are most closely related with credit losses in the relevant portfolio.

Details of these statistical parameters/inputs are as follows:

PD–The probability of default shall be an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the remaining estimated life, if the asset has not been previously derecognized and are still in the portfolio.

12-month PDs–This is the estimated probability of default occurring within the next 12months (or over the remaining life of the financial instrument if that is less than 12 months).This shall be used to calculate 12-month ECLs.

Lifetime PDs–This is the estimated probability of default occurring over the remaining life of the financial instrument.This shall be used to calculate lifetime ECLs for "stage2" and stage3 exposures.PDs shall be limited to the maximum exposure required by IFRS 9.

EAD–The exposure at default shall be an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected draw downs on committed facilities, and accrued interest from missed payments.

LGD–The loss given default shall be an estimate of the loss arising in the case where a default occurs at a given time. It shall be based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It shall be usually expressed as a percentage of the EAD.

The measurement of expected credit losses for each stage and the assessment of significant increases in credit risk considers information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward-looking information requires significant judgement.

The Company shall rely on a broad range of forward looking information as economic inputs, such as GDP growth, unemployment rates ,central bank base rates, crude oil prices, inflation rates and foreign exchange rates. The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays shall be made as temporary adjustments using expert credit judgement.

The Company shall determine allowance for credit losses using probability-weighted forward looking scenarios. The Company shall consider both internal and external sources of information in order to achieve an unbiased measure of the scenarios used. The Company prepares the scenarios using forecasts generated by credible sources such as Business Monitor International (BMI), International Monetary Fund (IMF), Nigeria Bureau of Statistics (NBS), World Bank, Central Bank of Nigeria (CBN), Nigeria Insurers Association, Financial Markets Dealers Quotation (FMDQ), and Trading Economics.

Assessment of Significant increase in Credit Risk (SICR)

At each reporting date, the company shall assess whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the remaining expected life from the reporting date and the date of initial recognition. The assessment considers borrower-specific quantitative and qualitative information without consideration of collateral, and the impact of forward-looking macroeconomic factors. The common assessments for SICR on retail and non-retail portfolios include macroeconomic out look,management judgement, and delinquency and monitoring. Forward looking Macroeconomic factors shall be a key component of the macroeconomic outlook. The importance and relevance of each specific macroeconomic factor depends on the type of product, characteristics of the financial instruments and the borrower and the geographical region.

The Company shall adopt a multi factor approach in assessing changes in credit risk. This approach considers: Quantitative (primary), Qualitative (secondary) and Back stop indicators which are critical in allocating financial assets into stages.

The quantitative models consider deterioration in the credit rating of obligor/counter party based on the company's internal rating system or External Credit Assessment Institutions (ECAI) while qualitative factors consider information such as expected forbearance, restructuring ,exposure classification by licensed credit bureau etc.

Assessment of Significant increase in Credit Risk (SICR) - cont'd

A back stop shall be used to ensure that in the (unlikely) event that the primary (quantitative) indicators do not change and there is no trigger from the secondary (qualitative) indicators, an account that has breached the 30 days past due criteria for SIC Rand 90 days past due criteria for default shall be transferred to stage 2 and stage 3 respectively except there is a reasonable and supportable evidence available without undue cost to rebut the presumption.

Definition of Default and Credit Impaired Financial Assets

At each reporting date, the Company shall assess whether financial assets are credit impaired. A financial asset shall be credit impaired when one or more of the following events have a detrimental impact on the estimated future cash flows of the financial asset:

Significant financial difficulty of the Issuer;

- A breach of contract such as a default or past due event;
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganization
- The disappearance of an active market for a security because of financial difficulties

A debt that has been renegotiated due to a deterioration in the issuer's condition shall be considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cashflows has reduced significantly and there shall be no other indicators of impairment. In making an assessment of whether an investment in sovereign debts is credit-impaired, the Company shall consider the following factors.

(i). The market's assessment of credit worthiness as reflected in the bond yields
(ii). The rating agencies' assessments of credit worthiness
(iii). The country's ability to access the capital markets for new debt issuance
(iv). The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness
(v). The international support mechanisms in place to provide the necessary support as lender of last resort to that country as well as the intention, reflected in public statements of governments and agencies to use those mechanisms.This includes an assessment of the depth of those mechanisms and irrespective of the political intent, whether there is the capacity to fulfil the required criteria

Effective Interest Rate

EIR (also denoted Internal Rate of Return or Level Yield to Maturity) is in the context of IFRS 9 , the interest rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or the amortised cost of a financial liability.

Presentation of allowance for ECL in the statement of financial position

Allowances for ECL shall be presented in the statement of financial position as follows:

- Financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets

Financial assets measured at FVOCI: no loss allowance shall be recognized in the statement of financial position because the carrying amount of these assets shall be their fair value. However, the loss allowance shall be disclosed and recognized in the fair value reserve.

50 **Solvency Margin**

The Company's solvency margin is summarised below:

	2023 N'000	2022 N'000
Company solvency	(6,904,499)	(5,969,733)
Regulatory minimum capital required	5,000,000	5,000,000
Deficit in solvency margin	(11,904,499)	(10,969,733)

The Company had a solvency margin of N(7.101)billion for the FIRST QUARTER ENDED 31 MARCH 2023 (2022: N6.426 billion), which is N12.101 billion below (2022: N11.426 billion) the regulatory minimum solvency of N5 billion for composite business. Detailed computation of solvency margin is shown below:

31 December, 2023

Assets	Note	Admissible N'000	Inadmissible N'000	Total N'000
Cash and cash equivalents	(i)	644,272	-	644,272
Financial assets:		-		
- At fair value through profit or loss		106,671	-	106,671
- At amortised cost		603,061	-	603,061
- Financial asset at FVOCI		1,532,639	-	1,532,639
Reinsurance assets		-	-	-
Trade receivable		8,849	-	8,849
Other receivables and prepayments	(ii)	167,316	-	167,316
Deferred acquisition cost		-	-	-
Investment properties	(iii)	1,900,000	2,130,067	4,030,067
Intangible assets		-	-	-
Property, plant and equipment		24,266	-	24,266
Statutory deposit		535,000	-	535,000
Total assets		5,522,074	2,130,067	7,652,141
Liabilities				
Insurance contract liabilities		5,147,043	-	5,147,043
Investment contract liabilities		2,619,361	-	2,619,361
Trade payables		44,205	-	44,205
Other payables		500,433	-	504,459
Borrowings		3,841,795	-	3,841,795
Finance lease obligation		-	-	-
Income tax liabilities		273,736		273,736
Deferred tax liabilities		-	61,909	61,909
Total liabilities		12,426,573	61,909	12,492,507
Excess of total admissible liabilities over admissible assets		(6,904,499)		
The higher of 15% of net premium and minimum paid up capital		5,000,000		
Deficit in Solvency margin		**(11,904,499)**		

(i) Cash and cash equivalents: The inadmissible portion represents the excess amount deposited in one bank which is above 20% statutory limit as at reporting date.

(ii) Other receivables and prepayments: the inadmissible portion of other receivables and prepayments represents amounts of other receivables and prepayments except staff loans made to members of staff in line with Section 24 (13) of the Insurance Act 2003.

The Company has total staff loans receivable of ₦444,000 as at 31 December, 2023. These have been admitted for the purpose of the computation while the remaining balance in other receivables and prepayments has been excluded.

(iii) Investment properties: The inadmissible portion of investment properties represent the balance of reserves arising from revaluation of the assets.

Valuation Methods

The Insurance Act, CAP I17, LFN 2004 does not specify any particular approach that must be used in determining the statutory value of insurance liabilities. Whilst some sections of the Act appear to make reference to the net premium approach to reserving, we understand that this simply reflects the practice at the time the Act was written and is not a requirement to adopt a net premium valuation approach. We have in the last few years adopted the gross premium valuation approach for statutory purposes as standard and this has been acceptable to NAICOM.

From the IFRS perspective, the main features of IFRS 4 that impact the liability calculations are as follows:

a) The IFRS prohibits provisions for possible claims under contracts that are not in existence at the end of the reporting period.

b) The IFRS requires an insurer to keep insurance liabilities in its statement of financial position until they are discharged or cancelled, or expire, and to present insurance liabilities without offsetting them against related reinsurance assets.

c) The IFRS requires a test for the adequacy of recognised insurance liabilities and an impairment test for reinsurance assets.

Liability adequacy

At each reporting date, an assessment is made of whether the recognized long-term business provisions are adequate, using current estimates of future cash flows. If that assessment shows that the carrying amount of the liabilities (less related assets) is insufficient in light of the estimated future cash flows, the deficiency is recognized in the profit or loss by setting up an additional provision in the statement of financial position.

Key assumptions in liability adequacy testing

IFRS 4 paragraph 15 describes the liability adequacy test which, if conditions are not met, requires any deficiency to be recognised in profit or loss. Paragraph 16 states that:

"If an insurer applies a liability adequacy test that meets the specified minimum requirements, this IFRS imposes no further requirements. The minimum requirements are the following:

a) The test considers current estimates of all contractual cash flows, and of related cash flows such as claims handling costs, as well as cash flows resulting from embedded options and guarantees.

b) If the test shows that the liability is inadequate, the entire deficiency is recognised in profit or loss."

51 Segment informatioin

The Company is organised into two operating segments. These segments distribute their products through various forms of brokers, agencies and direct marketing programs. These segments and their respective operations are as follows:

Non-Life: This segments covers the protection of customers' assets (particularly their properties, both for personal and commercial business) and indemnification of other parties that have suffered damage as a result of customers' accidents. All contracts in this segment are short-term in nature. Revenue in this segment is derived primarily from insurance premium, investment income, net realized gains on financial assets, and net fair value gains on financial assets at fair value through profit or loss.

Life: This segment covers the protection of the Company's customers against the risk of premature death, disability, critical illness and other accidents. Revenue from this segment is derived primarily from insurance premium,investment income, net realized gains on financial assets and net fair value gains on financial assets at fair value through profit and loss.

51.1 Segment profit or loss and other comprehensive income

51.4 **Asset Hypothecation**

The company is exposed to a range of financial risks through its financial assets, financial liabilities, reinsurance assets and insurance liabilities. In particular, the key financial risk is that in the long term its investment proceeds will not be sufficient to fund the obligations arising from its insurance contracts, in response to the risk, the Company's assets and liabilities are allocated as follows:

	Policy Holders' Fund							
	Non-Life	**Life Policy Insurance Contract Liabilities**	**Investment Contract Liabilities**	**Annuity**	**Shareholders' Fund**	**Total**	Total	**Change**
